

ESCAPE LEARNING

Escape learning is when a person or animal learns to terminate an aversive stimulus by engaging in a specific behavior.

EXAMPLES

- **Blocking Bright Sunlight:** The glaring sun is an aversive stimulus. A person can escape the aversive stimulus by putting on sunglasses.
- **Quitting your Job:** If the boss is making an employee's life miserable, then you may learn to just jump to a new job to escape the bad experience.

ESCAPE VS AVOIDANCE

There is a subtle distinction between escape learning and avoidance learning.

- **Escape learning** involves doing something to terminate an aversive stimulus.
- **Avoidance learning** involves learning how to avoid experiencing the aversive stimulus altogether.
