Hear The Silence:

Hallucination Fiona Macpherson, Dimitris Platchias, 2024-03-12 Scientific and philosophical perspectives on hallucination essays that draw on empirical evidence from psychology neuroscience and cutting edge philosophical theory Reflection on the nature of hallucination has relevance for many traditional philosophical debates concerning the nature of the mind perception and our knowledge of the world In recent years neuroimaging techniques and scientific findings on the nature of hallucination combined with interest in new philosophical theories of perception such as disjunctivism have brought the topic of hallucination once more to the forefront of philosophical thinking Scientific evidence from psychology neuroscience and psychiatry sheds light on the functional role and physiology of actual hallucinations some disjunctivist theories offer a radically new and different philosophical conception of hallucination This volume offers interdisciplinary perspectives on the nature of hallucination offering essays by both scientists and philosophers Contributors first consider topics from psychology and neuroscience including neurobiological mechanisms of hallucination and the nature and phenomenology of auditory verbal hallucinations Philosophical discussions follow with contributors first considering disjunctivism and then more generally the relation between hallucination and the nature of experience Contributors Istv n Aranyosi Richard P Bentall Paul Coates Fabian Dorsch Katalin Farkas Charles Fernyhough Dominic H ffytche Benj Hellie Matthew Kennedy Fiona Macpherson Ksenija Maravic da Silva Peter Naish Simon McCarthy Jones Matthew Nudds Costas Pagondiotis Ian Phillips Dimitris Platchias Howard Robinson Susanna Schellenberg Filippo Varese The Nineteenth Century and After ,1915

Sounds and Perception Matthew Nudds, Casey O'Callaghan, 2009-11-26 Sounds and Perception is a collection of original essays on auditory perception and the nature of sounds an emerging area of interest in the philosophy of mind and perception and in the metaphysics of sensible qualities The individual essays discuss a wide range of issues including the nature of sound the spatial aspects of auditory experience hearing silence musical experience and the perception of speech a substantial introduction by the editors serves to contextualise the essays and make connections between them This collection will serve both as an introduction to the nature of auditory perception and as the definitive resource for coverage of the main questions that constitute the philosophy of sounds and audition The views are original and there is substantive engagement among contributors This collection will stimulate future research in this area The Golden Book Magazine ,1928

Seeing Dark Things Roy Sorensen, 2008-01-08 If a spinning disk casts a round shadow does this shadow also spin When you experience the total blackness of a cave are you seeing in the dark Or are you merely failing to see anything just like your blind companion Seeing Dark Things uses visual riddles to explore our ability to see things that do not reflect light Shadows and holes are anomalies for the causal theory of perception which states that anything we see must be a cause of what we see This requirement neatly explains why you see the front of a book s jacket and not its rear when you look at it face on However the causal theory has trouble explaining how you manage to see the black letters on its surface The letters

are made visible by the light they fail to reflect rather than by the light they reflect Nevertheless Roy Sorensen defends the causal theory of perception by treating absences as causes His fourteen chapters draw heavily on common sense and psychology to vindicate the assumption that we perceive absences Seeing Dark Things is philosophy for the eye It contains fifty nine figures designed to prompt visual judgment Sorensen proceeds bottom up from observation rather than top down from theory He regards detailed analysis of absences as premature he hopes a future theory will refine the pictorial thinking stimulated by the book s riddles Just as the biologist pursues genetics with fruit flies the metaphysician can study absences by means of shadows Shadows are metaphysical amphibians with one foot on the terra firma of common sense and the other in the murky waters of nonbeing Sorensen portrays the causal theory of perception s confrontation with the shadows as a triumph against alien attack a victory that deepens a theory that resonates profoundly with common sense and science In sum Seeing Dark Things is an unorthodox defense of an orthodox theory Seeing Dark Things is an adventurous philosophical exercise in the ontology and epistemology of the commonsense world Its treatment of the many puzzles that surround such putative negative entities as shadows and holes will make it a classic on the literature on privations for many yeas to come The book is also a wonderful example of how philosophy can be done without falling into the traps of the academic rigmarole Sorensen is truly unique in his capacity to bring together classic philosophers contemporary authors and ticklish anecdotes Achille Varzi Columbia University This is a wonderful book full of a profound unsettling cleverness and weirdly satisfying counter intuitiveness that the subject requires a great book Richard Marshall Bookforum Sorensen is an extraordinarily fertile and imaginative philosopher drawing widely on philosophy physics biology and vision science to mine his chosen quarry His arguments anecdotes and examples are always engaging Add them to his effortless style and you have a rare commodity a book of serious philosophy that many non professionals will enjoy Ian Phillips Times Literary Supplement Sorensen s book is certainly fascinating and richly thought provoking he argues carefully and clearly in favour of his key claims all of which merit very serious consideration even if they sometimes provoke one to construct and defend alternative views That however is surely the hallmark of the very best kind of philosophy writing Seeing Dark Things is a model of this kind E J Lowe Philosophy
