Pacey, 1989-08-04 This is a practical guide for first time and experienced users of Flow Injection Analysis FIA It gives not a detailed theoretical analysis but a nuts and bolts approach to the description of the technique and how it can be utilized to solve analytical chemical problems The advantages of flow injection how when why and where it works are all fully explained Criteria for the choice of hardware and useful hints for maintenance are provided The large variety of detectors suitable to combine with FIA are discussed as are special modes of operation their advantages and their limitations and also conversion of batch methods to FIA methods Numerous in depth descriptions of applications of FIA techniques in water soil pharmaceutical and industrial analysis are featured and a complete bibliography is included The authors have spent several years demonstrating lecturing and using FIA and the basic outline of their book closely follows the schedule of the FIA workshops they have taught It will be an invaluable tool for all chemists who perform analyses on a routine basis

Flow Injection Analysis Jaromir Ruzicka, Elo Harald Hansen, 1988-03-03 This Second edition of the flow injection analysis FIA text which has become a standard in the field in four languages is written by two pioneers in the field who have themselves discovered many of the techniques and designed much of the equipment employed in FIA Newly revised to account for the many recent developments in FIA this book presents the state of the art in FIA theory techniques and future trends Specific topics covered include continuous flow analyzers chemical kinetics in an FIA system theory of dispersion related to FIA single line FIA manifolds FIA determinations based on separation processes commercially available flow injection analyzers the FIA laboratory a microconduit based pedagogical system review of the flow injection literature and flow injection analysis now and in the future

Flow Injection Analysis: Instrumentation And Applications Marek Trojanowicz, 2000-04-28 The concept of flow injection analysis FIA was introduced in the mid seventies It was preceded by the success of segmented flow analysis mainly in clinical and environmental analysis This advance as well as the development of continuous monitors for process control and environmental monitors ensured the success of the FIA methodology As an exceptionally effective means of mechanization for various procedures of wet chemical analysis the FIA methodology in use with a whole arsenal of detection methods of modern analytical chemistry proved to be of great interest to many The fast and intensive development of the FIA methodology was due to several factors essential for routine analytical determinations such as very limited sample consumption the short analysis time based on a transient signal measurement in a flow through detector and an on line carrying out difficult operations of separation preconcentration or physicochemical conversion of analytes into detectable species Twenty year studies by numerous research groups all over the world have provided significant progress in the theoretical description of dispersion phenomena in FIA and various operations of physicochemical treatment of the analyte This volume is devoted to the presentation of the current status of development of the instrumentation for FIA and the many fields of its practical applications based on an extensive bibliography of original

research publications
