The Moving Tablet of the Eye Nicholas J. Wade, 2005 Tracing the history of eye movement research this work shows how great strides were made in this area before modern recording devices were available especially in the measurement of nystagmus

Current Trends in Eye Tracking Research Mike Horsley, Matt Eliot, Bruce Allen Knight, Ronan Reilly, 2013-12-11 Our eye movements in response to visual stimuli reveal much about how we experience the world Focusing on the latest developments in the multidisciplinary field of eye tracking research this volume ranges across a wide spectrum of research applications with four sections covering the plethora of practical uses to which our expanding knowledge can be put They offer abundant evidence that eye tracking research and its methodologies offer new ways of collecting data framing research questions and thinking about how we view our world As a result we are discovering more about how the visual system works as well as how it interacts with attention cognition and behaviour

Current Trends in Eye Tracking Research presents the work of more than 50 researchers and academics showcasing groundbreaking studies and innovative ways of applying eye tracking technologies to interesting research problems The book covers the current output of a number of pioneering research laboratories detailing their work on eye tracking and the visual system alignment and EEG data marketing and social applications and eye tracking in education Featuring creative uses of existing technology as well as inventive implementation of new technology in a range of research contexts and disciplines this new publication is compelling proof of the growing importance of this exciting and fast moving area of scientific endeavor

Eye Movement Research Gerd Lüer, 1988

Eye Movements Roger PG van Gompel, 2007-03-27 Eye movement recording has become the method of choice in a wide variety of disciplines investigating how the mind and brain work This volume brings together recent high quality eye movement research from many different disciplines and in doing so

presents a comprehensive overview of the state of the art in eye movement research Sections include the history of eye movement research physiological and clinical studies of eye movements transsaccadic integration computational modelling of eye movements reading spoken language processing attention and scene perception and eye movements in natural environments Includes recent research from a variety of disciplines Divided into sections based on topic areas with an overview chapter beginning each section Through the study of eye movements we can learn about the human mind and eye movement recording has become the method of choice in many disciplines

Eye Tracking Kenneth Holmqvist,Marcus Nyström,Richard Andersson,Richard Dewhurst,Halszka Jarodzka,Joost van de Weijer,2011-09-22 We make 3 5 eye movements per second and these movements are crucial in helping us deal with the vast amounts of information we encounter in our everyday lives In recent years thanks to the development of eye tracking technology there has been a growing interest in monitoring and measuring these movements with a view to understanding how we attend to and process the visual information we encounter Eye tracking as a research tool is now more accessible than ever and is growing in popularity amongst researchers from a whole host of different disciplines Usability analysts sports scientists cognitive psychologists reading researchers psycholinguists neurophysiologists electrical engineers and others all have a vested interest in eye tracking for different reasons The ability to record eye movements has helped advance our science and led to technological innovations However the growth of eye tracking in recent years has also presented a variety of challenges in particular the issue of how to design an eye tracking experiment and how to analyse the data This book is a much needed comprehensive handbook of eye tracking methodology It describes how to evaluate and acquire an eye tracker how to plan and design an eye tracking study and how to record and analyse eye movement data Besides technical details and theory the heart of this book revolves around practicality how raw data samples are converted into fixations and saccades using event detection algorithms how the different representations of eye movement data are calculated using AOIs heat maps and scanpaths and how all the measures of eye movements relate to these processes Part I presents the technology and skills needed to perform high quality research with eye trackers Part II covers the predominant methods applied to the data which eye trackers record These include the parsing of raw sample data into oculomotor events and how to calculate other representations of eye movements such as heat maps and transition matrices Part III gives a comprehensive outline of the measures which can be calculated using the events and representations described in Part II This is a taxonomy of the measures available to eye tracking researchers sorted by type of movement of the eyes and type of analysis For anyone in the sciences considering conducting research involving eye tracking this book will be an essential reference work

Art & eye-tracking Łukasz Kędziora,2020-03-01 In the guide you will find comprehensive information on how to analyse and interpret works of art using devices that follow and register eye movements The publication is addressed to artists art theorists and enthusiasts who would like to design eye tracking

experiments connected with perceiving all kinds of artistic activity Although the tradition of conducting this type of research dates back over nearly one hundred years so far no coherent study discussing technology methodology and analysis of eye tracking experiment results with reference to art has ever been provided The guide is divided into six complementary parts The first one includes a general overview of the relations between eye tracking and the history of art The second chapter explains various techniques of conducting research and offers specification of selected devices In the third part you will learn about crucial for eye tracking the most frequent ways of determining the pupil location as well as some problems related to proper eye tracker calibration process The fourth part discusses factors essential for conducting experiments correctly which include procedures for selecting study participants space interface and instructions The next chapter presents various kinds of data we obtain from experiments Chapter six includes detailed instructions scenarios for conducting eye tracking experiments with regard to different works of art

Eye Movement Research Methods Jonathan Vaughan,2002 *Visual and Oculomotor Functions* G. d'Ydewalle,J. van Rensbergen,2013-10-22 A collection of contemporary work in various areas of eye movement research with an emphasis on physiological aspects is presented in this book The contributions are divided into six sections I saccadic eye movements II smooth pursuit and motion perception III eye movements in pathology and clinical settings IV neurophysiology of eye movements V optokinetic nystagmus and VI methods This volume provides updated information on the most recent research on eye movements carried out mainly in Europe

Eye movement research : mechanisms, processes and applications John Malcolm Findlay,Robert W. Kentridge,Robin Walker,1995

Eye Movement Research Program; Annual Report S. Jordan,1969 The Mind's Eye Ralph Radach,Jukka Hyona,Heiner Deubel,2003-06-05 The book provides a comprehensive state of the art overview of current research on cognitive and applied aspects of eye movements The contents include peer reviewed chapters based on a selection of papers presented at the 11th European Conference on Eye Movements Turku Finland 2001 supplemented by invited contributions The ECEM conference series brings together researchers from various disciplines with an interest to use eye tracking to study perceptual and higher order cognitive functions The contents of the book faithfully reflect the scope and diversity of interest in eye tracking as a fruitful tool both in basic and applied research It consists of five sections visual information processing and saccadic eye movements empirical studies of reading and language production computational models of eye movements in reading eye tracking as a tool to study human computer interaction and eye movement applications in media and communication research Each section is concluded by a commentary chapter by one of the leading authorities in the field These commentaries discuss and integrate the contributions in the section and provide an expert view on the most significant present and future developments in the respective areas The book is a reference volume including a large body of new empirical work but also principal theoretical viewpoints of leading research groups in the field

Current Oculomotor Research Wolfgang Becker (Dr. -Ing.),Heiner Deubel,1999-01-31 Human behaviour and communication relies heavily on

visual guidance and visually coded information and therefore is tightly coupled to eye movements Consequently many parts of our brains are involved in eye movement control and phenomena contingent on eye movement This volume covers the latest research from a large group of laboratories covering all aspects of oculomotor research from physiology engineering and medical sciences to experimental psychology and cognitive sciences *Eye Movement Research* Mary P.. Lord,1949

Eye Movements and Psychological Functions Rudolf Groner,Christine Menz,Dennis F. Fisher,Richard A. Monty,2021-09-30 Originally published in 1983 this volume represents the edited proceedings of the first conference organized by the European Group for Eye Movement Research with the theme Eye Movements Current Research and Methodology The conference was held at the Department of Psychology University of Bern Switzerland in 1981 The book is divided into four parts covering Methods Central and Peripheral Processing Picture Viewing and Visual Tracking and Cognitive Processes and Reading Each part is introduced by one of the session chairpersons of the conference
