Lopez, Jr.,2015-11-24 This anthology first published in 1995 illustrates the vast scope of Buddhist practice in Asia past and present Re released now in a slimmer but still extensive edition Buddhism in Practice presents a selection of thirty five translated texts each preceded by a substantial introduction by its translator These unusual sources provides the reader with a sense of the remarkable diversity of the practices of persons who over the course of 2 500 years have been identified by themselves or by others as Buddhists Demonstrating the many continuities among the practices of Buddhist cultures widely separated by both history and geography Buddhism in Practice continues to provide an ideal introduction to Buddhism and a source of new insights for scholars *Marion and Derrida on The Gift and Desire: Debating the Generosity of Things* Jason Alvis,2016-01-13 This book examines the various encounters between Jean Luc Marion and Jacques Derrida on the gift considers their many differences on desire and demonstrates how these topics hold the keys to some of phenomenology s most pressing structural questions especially regarding deconstructive approaches within the field The book claims that the topic of desire is a central lynchpin to understanding the two thinkers conflict over the gift for the gift is reducible to the desire to give which initiates a turn to the topic of generosity To what degree might loving also imply giving How far might it be suggested that love is reducible to desire and intentionality It is demonstrated how Derrida the generative father of deconstruction rejects the possibility of any potential relation between the gift and desire on the account that desire is bound to calculative repetition economical appropriation and subject centered interests that hinder deconstruction Whereas Marion a representative of the phenomenological tradition demands a unique union between the gift and desire which are both represented in his reduction to givenness and erotic reduction The book is the first extensive attempt to contextualize the stark differences between Marion and Derrida within the phenomenological legacy Husserl Heidegger Kant supplies readers with in depth accounts of the topics of the gift love and desire and demonstrates another means through which the appearing of phenomena might be understood namely according to the generosity of things **Enamels, Crowns, Relics and Icons** Paul Hetherington,2008 This volume gathers together 17 articles published over the last 30 years together with one appearing here for the first time Their focus is primarily on enamel the brilliant and colourful art form for which the Byzantines were famous throughout the medieval world but sculpture and glyptics also figure The author examines not only works which have retained the form in which they were first created but others which have had their original Byzantine elements re used often by artists in the West While most of the works featured here have been known to scholars before one was unknown prior to its first publication in 2006 **ICONS** Herbert M.
