## **Godless Communists:**

**"Godless Communists"** William B. Husband, 2002-09 Godless Communists offers a fresh interpretation of early Soviet efforts to create an atheistic scientific society Husband shows that religion contrary to Bolshevik assertions was not merely an expression of gullibility and ignorance but a firmly entrenched system for ordering family and community relationships The Bolsheviks efforts to abolish the Church failed because they underestimated how tightly religious beliefs were woven into the fabric of the Russians daily lives Exploring the confrontation between secularism and the lower classes traditional beliefs Godless Communists illustrates how developments between 1917 and 1932 shaped the attitudes toward religion and atheism that endure in Russia today

**Science, Religion and Communism in Cold War Europe** Paul Betts, Stephen A. Smith, 2016-05-14 Religion and science were fundamental aspects of Eastern European communist political culture from the very beginning and remained in uneasy tension across the region over the decades While both topics have long attracted a great deal of scholarly attention they almost invariably have been studied discretely as separate stories Religion Science and Communism in Cold War Europe is the first scholarly effort to explore the delicate interface of religion science and communism in Cold War Europe It brings together an international team of researchers who address this relationship from a number of national viewpoints and thematic perspectives ranging from mysticism to social science space exploration to the socialist lifecycle and architectural heritage to pop culture

*Imagine There's No Heaven* Mitchell Stephens, 2014-02-25 The historical achievements of religious belief have been large and well chronicled But what about the accomplishments of those who have challenged religion Traveling from classical Greece to twenty first century America *Imagine There's No Heaven* explores the role of disbelief in shaping Western civilization At each juncture common themes emerge by questioning the role of gods in the heavens or the role of a God in creating man on earth nonbelievers help move science forward By challenging the divine right of monarchs and the strictures of holy books nonbelievers including Jean Jacques Rousseau and Denis Diderot help expand

human liberties and influence the early founding of the United States Revolutions in science in politics in philosophy in art and in psychology have been led on multiple occasions by those who are free of the constraints of religious life Mitchell Stephens tells the often courageous tales of history's most important atheists like Denis Diderot and Salman Rushdie Stephens makes a strong and original case for their importance not only to today's New Atheist movement but to the way many of us believers and nonbelievers now think and live

**And God Created Lenin** Paul Gabel, 2010-10-04 This book examines in depth the conflict between Lenin's logic driven efforts to stamp out religion and the churches' passionate attempts to save themselves from obliteration It looks at both sides objectively and admits that they both presented strong cases In this thoroughly researched yet accessible study historian Paul Gabel offers a new understanding of the only effort in world history to upset the universality of religion Besides the main conflict between the Russian Orthodox Church and the atheist state Gabel also considers the tensions that this campaign against religion caused within the Communist Party In addition he discusses the bitter hatred dividing the Orthodox factions that refused cooperation with the government from those that tried to adapt the church to communism Was the failure of Soviet communism to eradicate religion simply a matter of practical miscalculation or was this effort in light of the persistence of religion throughout history ultimately unrealistic and doomed from the start This is the key question that Gabel's fascinating insightful narrative attempts to answer
