Poetry of a Life Sharon Romero,2021-07-20 The book is about love marriage children war betrayal and music The author attempts to invoke feelings with her writing She believes others can relate to her selection of poetry She would like to share with others her own measure of love happiness and disappointment She hopes you will love her book on poetry and that it will speak to your heart with insight empathy and encouragement She also believes you can grasp your own meaning about her selection of poetry and as it may relate within yourself **A Dictionary of Everyday English Metaphors** Han Rong Qin,2025-09-10 This was published by the most prestigious university press in China Peking University Press in 2011 There have been many world famous English research masters in that university which gives us sound academic support in producing the book This book was written in English and Chinese The metaphors are explained in English and Chinese and the example sentences were mostly gleaned from the famous novel writers and playwrights renowned magazines newspapers government documents etc with Chinese translation The book was composed of 25 sections A B C D E F G H I J K L M N O P Q R S T U V W Y Z We tried to make the language of the book simple and succinct One of our web friends said the language if the book was ludicrously succinct Metaphors make our language rich and beautiful One word or phrase is applied to something or someone not literally just in comparison to something or someone to make the description more powerful For example evening of one s life cut off one s nose to spite one s face Many of our great writers through their works show they are language masters of using metaphors which make their works vivid and powerful As for the translators of languages they have to pay special attention to metaphors As a famous translator someone in 1920s translated the Milky Way Galaxy into Chinese literally as road full of milk which today is still a joke in Chinese translating circles Actually you find very few books about metaphors while people find these books are helpful We hope this book will give tremendous help to language learners translators and writers of novels and play writers and other English users **A Dictionary of Confusable Phrases** Yuri Dolgopoplov,2016-02-01 Covering over 10 000 idioms and collocations characterized by similarity in their wording or metaphorical idea which do not show corresponding similarity in their meanings this dictionary presents a unique cross section of the English language Though it is designed specifically to assist readers in avoiding the use of inappropriate or erroneous phrases the book can also be used as a regular phraseological dictionary providing definitions to individual idioms cliches and set expressions Most phrases included in the dictionary are in active current use making information about their meanings and usage essential to language learners at all levels of proficiency *The Peter Blauner Collection Volume One* Peter Blauner,2018-04-17 Gripping crime thrillers from the New York Times bestselling author of *The Intruder* and *Proving*

Ground Nobody writing suspense novels does it as well James Patterson Praised by everyone from Stephen King and James Patterson to Dennis Lehane and James Ellroy New York Times bestselling author Peter Blauner has proven himself a master of the crime thriller In the three novels collected here including Blauner s Edgar Award winning debut the former journalist delivers breathtaking suspense alongside provocative questions of morality and ethics Slow Motion Riot Blauner s Edgar Award winning first novel is a thriller with a conscience Entertainment Weekly That conscience belongs to probation officer Steven Baum who still hopes to make a difference in a city plagued by drugs murders and corruption But his newest charge is about to challenge him to his core Darryl King is not just a small time drug dealer he s a psychopathic cop killer Harrowing The Washington Post Exceptionally well done Andrew Vachss Casino Moon Blauner s story of the son of an Atlantic City mobster is a gritty novel with integrity and style James Patterson Anthony Russo s scheme for staying out of the family crime business is to manage a has been boxer s comeback But it s Russo who ultimately takes the fall as he discovers it s not so easy to escape the sins of his father You could cut a lip on his dialogue The New York Times This book has it all Blauner is brilliant James Ellroy Man of the Hour When high school English teacher David Fitzgerald rescues a student after a terrorist bomb explosion on a school bus he is lauded as a hero until an ambitious reporter raises suspicions about Fitzgerald s involvement and he finds himself hounded by the media and under investigation by the police A remarkable achievement I loved it and couldn t put it down Stephen King As impressive for its realism as for its suspense Publishers Weekly The Imperial magazine; or, Compendium of religious, moral, & philosophical knowledge. Vol.1-12. 2nd ser. (ed. by S. Drew). Vol.1-4 , **The GOD Entity** Scott S Gordon,2015-09-18 Theoretical physics has reached an impasse that many feel is a dead end As the odds of finding evidence for supersymmetry starts to fade new theories have emerged such as The Multiverse Extra Dimensions and Dimensional Transmutation These theories attempt to explain the inexplicable yet at the same time fail to explain the explainable Many physicists are left frustrated and wondering aloud How could we have travelled so far down the wrong path Any intelligent fool can make things bigger and more complex It takes a touch of genius and a lot of courage to move in the opposite direction Albert Einstein Engineers know that the right answer is usually a simple one As Einstein would put it The grand aim of all science is to cover the greatest number of empirical facts by logical deduction from the smallest number of hypotheses or axioms Gordon s theory of everything starts with only two postulates the massless bosons called Gordon Omnipresent Dots or GOD entities and the E0 energy associated with their initial alignment These primordial postulates are the only building blocks of a model that explains the inevitable course of events that created our universe The mathematics created within this process corrects the postulates used to develop the theories of relativity and quantum mechanics which can finally be united and subsequently applied to the infinitesimally small and the infinitely large We currently use parameters such as distance time straight lines velocity electric charge energy fields and mass Gordon s theory of everything begins at a time when none of these parameters existed prior to the Big Bang It takes

nothing for granted as a predestined process unfolds creating these parameters as they come into existence defined by the evolving mathematics The Gordon model reveals that energy exists in three separate Gordon energy states described by The GOD equation The interaction between these energy states result in the formation of energy fields and the creation of all forces Most importantly the structure of space time from the previously unrecognized G0 energy state provides the solid foundation upon which we are able to build a new understanding of everything in the universe The simplicity and elegance of Gordon s theory of everything will astonish everyone as everything falls into place The purpose of this book is to put the field of physics on a theoretically sound foundation The structures of the first few fundamental particles and the energy fields they generate are just the beginning You will have the opportunity to make major contributions Starting where this book leaves off at the up quark and electron the race is on to find the internal structure of a neutron and all the particles of the standard model Don t be left behind Be among the first to read Scott S Gordon s *The GOD Entity Gordon s Theory of Everything*
