## **Engineering Principles Of Physiologic Function:**

**Engineering Principles of Physiologic Function** Daniel J. Schneck,1990 Despite its seeming complexity the physiologic organism is basically an isobaric isothermal electrochemical engine which functions in space and time in accordance with fundamental principles of mass energy momentum and information transport and utilization Using this philosophy *Engineering Principles of Physiologic Function* addresses the engineering analysis of physiologic function including control of physiologic processes is typical of most physiology or anatomy texts this book approaches the study of physiologic function from the point of view that there is some finite set of fundamental principles that underlie all such function The intent of the book is to identify both qualitatively and quantitatively through closed form mathematical solutions techniques of dimensional analysis analytical methods of control theory and other engineering formulations physical features and engineering principles that govern the behaviour of all organ systems uniformly and are the common denominators of all physiologic function *Engineering Principles in Physiology* J. H. U. Brown,Donald S. Gann,2014-05-10 *Engineering Principles in Physiology* Volume I covers the various aspects of biomedical engineering This volume is organized into three parts encompassing 12 chapters that consider a holistic approach to physiology and the principles of communication and control including energy input and output The first part deals with the physiological information and related concepts as well as the overall integration in the living body The second part highlights the communication integration of the central nervous system as a whole with the body s various sense organs The third part focuses on the diversity of function and modeling of various glandular functions of the endocrine system This part briefly deals with the cardiovascular system as a system of communication and control This book will prove useful to physiologists biomedical engineers and workers in the related fields
