God Without Being

Lieven Boeve, Christophe Brabant

God Without Being:

God Without Being Jean-Luc Marion, 1995-06-15 Jean Luc Marion advances a controversial argument for a God free of all categories of Being Taking a characteristically postmodern stance Marion challenges a fundamental premise of both metaphysics and neo Thomist theology that God before all else must be Rather he locates a God without Being in the realm of agape of Christian charity or love This volume the first translation into English of the work of this leading Catholic philosopher offers a contemporary perspective on the nature of God An immensely thoughtful book It promises a rich harvest Marion s highly original treatment of the idol and the icon the Eucharist boredom and vanity conversion and prayer takes theological and philosophical discussions to a new level Norman Wirzba **Christian Century**

Derrida and Negative Theology Professor Harold Coward, Harold G. Coward, Toby Foshay, Jacques Derrida, 1992-01-01 This book explores the thought of Jacques Derrida as it relates to the tradition of apophatic thought negative theology and philosophy in both Western and Eastern traditions Following the Introduction by Toby Foshay two of Derrida s essays on negative theology Of an Apocalyptic Tone Newly Adopted in Philosophy and How to Avoid Speaking Denials are reprinted here These are followed by essays from a Western perspective by Mark C Taylor and Michel Despland and essays from an Eastern perspective by David Loy a Buddhist and Harold Coward a Hindu In the Conclusion Jacques Derrida responds to these discussions

Between Philosophy and Theology Lieven Boeve, Christophe Brabant, 2010 Long past the time when philosophers from different perspectives had joined the funeral procession that declared the death of God a renewed interest has arisen in regard to the questions of God and religion in philosophy This book brings some of these philosophical views together to present an overview of the philosophical scene in its dealings with religion but also to move beyond the outsider s perspective Reflecting on these philosophical interpretations from a fundamental theological perspective the authors discover in what way these interpretations can challenge an understanding of today s faith **"No Being Without God"**

Laurence Paul Hemming, 1997 **'Being Towards Death'** Sylvie Avakian, 2021-04-19 This book draws the philosophical contribution of Martin Heidegger together with theological spiritual insights from the East especially that of Nikolai Berdyaev Thus it brings into dialogue the West with the East and philosophy with theology By doing so it offers Christian theology an existential spiritual language that is relevant and meaningful for the contemporary reader In particular the work explores Heidegger s being towards death Sein zum Tode as the basis for theological philosophical thinking Only the one who embraces being towards death has the courage to think and poetize This thinking in turn makes being towards death possible and in this circular movement of thinking and being the mystery of being reveals itself and yet remains hidden Since the work aims at demonstrating being towards death through language it transitions away from the common formulations and traditionally accepted ways of writing dogmatic theology towards an original philosophical reflection on faith and spirituality At different points however the work also retrieves the profound thoughts and theologies of the past the insightful creativity

of which cannot be denied *The Voiding of Being* William Desmond, 2020 In contemporary philosophy the status indeed the very viability of metaphysics is a much contested issue The reflections offered here explore diverse aspects of this contested status and offer a defense of metaphysics In other works perhaps most fully in *Being and the Between* William Desmond has tried to develop what he calls a metaxological metaphysics in response to different skeptical if not hostile approaches to metaphysics quite common in our time *The Voiding of Being* complements the systematic dimensions of this metaxological metaphysics outlined in *Being and the Between* It presents a set of studies which amplify important themes in the unfolding of modern metaphysics in relation to major earlier and contemporary thinkers while adding nuance to what is involved in the more systematic articulation of a metaxological metaphysics There is what the author calls a voiding of being in modernity expressed in diverse developments of thought *The Voiding of Being* might seem to conjure up too negative associations but the aim of the thoughts gathered here is not at all negative While attempting to understand the voiding of being in modern thought our appreciation of the promise of metaphysical thinking can also be renewed and indeed extended beyond skepticism and hostility to metaphysics Desmond engages many interlocutors along the way from the long tradition such as Heraclitus Aquinas and Hegel as well as more contemporary thinkers like Heidegger and Marion As the book's subtitle suggests it is concerned with the continued doing of metaphysics and not only the contemporary undoing of it

Rethinking Faith Antonio Cimino, Gert-Jan van der Heiden, 2016-11-03 Heidegger has often been considered as the proponent of the end of metaphysics in the post Hegelian philosophy due to his persistent attempts to overcome the ontological framework of traditional metaphysics Yet this dismissal of metaphysical theological and religious motives is deeply ambiguous since new forms of metaphysical and religious experience re-emerge in his philosophical works Heidegger shares this ambiguous relation to the notions of faith and religion with authors such as Nietzsche and Wittgenstein whose works are also marked by a critique of metaphysics and by a characteristic rethinking of the role of faith and religion In fact all three still remain among other things reference points for contemporary philosophical debates relating to the phenomenon of religion and faith *Rethinking Faith* explores how the phenomena of religion and faith are present in the works of Heidegger Nietzsche and Wittgenstein and how these phenomena are brought into play in their discussion of the classical metaphysical motives they criticize *Descartes and Augustine* Stephen Menn, Stephen Philip Menn, 2002-01-28 This book is a systematic study of Descartes' relation to Augustine It offers a complete reevaluation of Descartes' thought and as such will be of major importance to all historians of medieval neo-Platonic or early modern philosophy Stephen Menn demonstrates that Descartes uses Augustine's central ideas as a point of departure for a critique of medieval Aristotelian physics which he replaces with a new mechanistic anti-Aristotelian physics Special features of the book include a reading of the *Meditations* a comprehensive historical and philosophical introduction to Augustine's thought a detailed account of Plotinus and a contextualization of Descartes' mature philosophical project which explores both the framework within which it evolved and
