Appreciating Difference Sam Gill,2018-11-15 Across the world from personal relationships to global politics differences
cultural religious racial gender age ability are at the heart of the most disruptive and disturbing concerns While it is laudable
to nurture an environment promoting the tolerance of difference Creative Encounters Appreciating Difference argues for the
higher goal of actually appreciating difference as essential to creativity and innovation even if often experienced as stressful
and complex Even encounters that are apparently harmful and negatively valued arguments conflict war oppression usually
heighten the potential for creativity innovation movement action and identity Drawing on classic encounters that have played
a significant role in the founding of the academic study of religion and the social sciences this book explores in some depth
the dynamics of encounter to reveal both its problematic and creative aspects and to develop perspectives and strategies to
assure encounters both include the appreciation of difference and also are recognized as creative and innovative The two
examples most extensively considered show that the academic study of the peoples indigenous to North America and to
Australia involved creative constructions concoctions of primary examples in order to establish and give authority to
academic theories and definitions Rather than damning these examples as bad scholarship this book considers them to be
encounters engendering creative constructions that are distinctive to academia yet their potential for harm must be
understood Most important to the book is a persistent development of perspectives and strategies for understanding and
approaching encounters in order to assure the appreciation of difference is accompanied by the potential for creativity and
innovation Specific perspectives and strategies are related to naming moving gesture and play and particularly relevant to
religion the development of an aesthetic of impossibles Since these historical examples engage highly relevant present
concerns the distinction of real and fake truth and lie map and territory the threading essays show how these more or less
classic examples might contribute to appreciating these contemporary concerns that are generated in the presence of
difference With Cortes the Conqueror Virginia Watson,1917 A fictional retelling of the Cortes s invasion of Mexico and
