Duarte,2012-10-17 Education is not an art of putting sight into the eye that can already see but one of turning the eye towards the proper gaze of Being That s what must be managed Plato insists This claim is the take off point for Eduardo Duarte s meditations on the metaphysics and ontology of teaching and learning In Being and Learning he offers an account of learning as an attunement with Being s dynamic presencing and unconcealment which Duarte explores as the capacity to respond and attend to the matter that stands before us or in Arendtian terms to love the world and to be with others in this world This book of poetic thinking is a chronicle of Duarte s ongoing exploration of the question of Being a philosophical journey that has been guided primarily through a conversation with Heidegger and which also includes the voices of Plato Aristotle Heraclitus Nietzsche as well Lao Tzu and the Buddha among others In Being and Learning Duarte undertakes a phenomenology of the original a writing that consciously and conspicuously interrupts the discursive field of work in philosophy of education As the late Reiner Schurmann described this method it recalls the ancient beginnings and it anticipates a new beginning the possible rise of a new economy among things words and actions Being and Learning is a work of parrhesia a composition of free thought that disrupts the conventional practice of philosophy of education and thereby open up gaps and spaces of possibility in the arrangement of words concepts and ideas in the field With this work Eduardo Duarte is initiating new pathways of thinking about education
