

Final Year Project Proposal (228.485, 2011)

Title: Assignment Marking Application for the iPad

Supervisor: Dr Eva Heinrich

Project Description

The tertiary sector is in a state of transition from paper-based assignment submission and marking to electronically supported assignment submission and marking. Electronic assignment submission has many advantages over paper submission, for example in convenience for students, avoidance of postal delays and automated bookkeeping. When it comes to reading student work and marking, teachers are still divided in their preferences. Some prefer reading paper documents, while others do not mind or even prefer to read student work onscreen. One of the arguments that is brought forward in support of paper is about 'feel' and 'directness'. For example, the teacher can touch the paper, point at a section, and write directly on it. While some applications used for marking, like PDF annotation software or Word track changes, replicate the paper interaction to a certain degree, the feel for the user is very different. New devices like the iPad open up new possibilities in interacting with electronic documents. This project is about exploring how an iPad could be used to come closer to the real or perceived advantages of paper in the context of assignment marking.

One aspect of the project would be to explore how the user interface capabilities of the iPad facilitate direct interaction of student work, for reading student work, for annotating student work with information supporting the marking process and for providing feedback to students that is linked closely into the document. Marker input will be an important aspect of this work. This will likely go beyond typing and should explore the possibility of audio input.

Project Context

This project fits into the wider context of the Lightwork project (<http://lightworkmarking.org>). Lightwork is a Moodle compatible open source application for the management and marking of assignments. Lightwork is a Java-based application that provides support for marking (e.g., marking rubrics) and the management of marking teams. Lightwork contains its own PDF Annotator for the direct annotation of student work.

The final year project could interface with Lightwork, for example in providing a 'lite' Lightwork client that deals specifically with marking of student work without performing the setup or management tasks required for assignment marking.

Final Proposal K. Bromberg,2026-03-17 One stormy night One hotel bar full of stranded travelers One available chair next to a charming mysterious and sexy as hell man There was something about him and our conversation that made me feel alive That made me feel heard That sparked a fire within me When our paths crossed again I never expected the stranger to be Fordham Sharpe one third of the sinfully rich and ridiculously successful Sharpe International Network brothers Nor did I expect we d become partners fifty fifty in a hotel transformation that dreams were made of My dreams anyway To him I was off limits He was my venture partner and we knew better than to mix business with pleasure But we had one thing in common we were both hiding From our pasts From unresolved family conflicts From what really mattered our hearts But as each day passed our mutual attraction became harder to resist We agreed to the partnership to prove our worth to our families but perhaps we d only prove our need for something else Each other **THE FINAL PROPOSAL** Robyn
