Face To Face Interaction:

Organization of Behavior in Face-to-face Interaction Adam Kendon, Richard M. Harris, Mary Ritchie Key, 1975
Papers from the 9th International Congress of Anthropological and Ethnological Sciences Face-to-Face Communication over the Internet Arvid Kappas, Nicole C. Krämer, 2011-06-16 Social platforms such as MySpace Facebook and Twitter have rekindled the initial excitement of cyberspace Text based computer mediated communication has been enriched with face to face communication such as Skype as users move from desktops to laptops with integrated cameras and related hardware Age gender and culture barriers seem to have crumbled and disappeared as the user base widens dramatically Other than simple statistics relating to e mail usage chatrooms and blog subscriptions we know surprisingly little about the rapid changes taking place This book assembles leading researchers on nonverbal communication emotion cognition and computer science to summarize what we know about the processes relevant to face to face communication as it pertains to telecommunication including video conferencing The authors take stock of what has been learned regarding how people communicate in person or over distance and set the foundations for solid research helping to understand the issues implications and possibilities that lie ahead Face-to-Face Interaction Starkey Duncan, Donald W. Fiske, 2015-10-23 Originally published in 1977 This book focuses on how to do research in the area of face to face interaction when studying human social conduct It covers the methods of data collection and analysis and looks at the efficiency of these It secondarily considers a model for conceptualising such interactions drawing together several social science components especially linguistics based on the idea that there is an organisational structure at work just as with grammar for language Overall the book proposes a general conceptual framework for guiding empirical investigation with emphasis on simultaneous study of a number of acts viewed within each other's contexts This is an excellent resource for study on non verbal communications describing specific studies as well as offering the clear overview and model for research The Media and Modernity John B. Thompson, 1995 What role have communication media played in the formation of modern societies How should we understand the social impact of new forms of communication and information diffusion from the advent of printing in fifteenth century Europe to the expansion of global communication networks today In this major new work Thompson addresses these and other questions by elaborating a distinctive social theory of communication media and their impact He argues that the development of communication media has transformed the spatial and temporal constitution of social life creating new forms of action and interaction which are no longer linked to the sharing of a common locale The consequences of this transformation are far reaching and impinge on many aspects of our lives from the most intimate aspects of personal experience and self formation to the changing nature of power and visibility in the public domain Combining breadth of vision with sensitivity to detail this book situates the study of the media where it belongs among a set of disciplines concerned with the emergence development and structural characteristics of modern societies and their futures

Understanding Face-to-face Interaction Karen Tracy, 2013-11-05 Challenging current work in communication and social psychology that assumes face to face interaction can be adequately understood without attending to discourse expression this volume examines how people's goals concerns and intentions can be related to discourse expression The text discusses discourse goal linkages in specific face to face encounters such as courtroom exchanges marital counseling and intellectual discussions as well as in more general theoretical dilemmas Because it poses a new set of questions about social actors motivations and pre interactional goals this volume offers a new direction for discourse study one that seriously considers the thinking and strategy involved in human communication

The Media and Globalization Terhi Rantanen, 2005 In this provocative book Terhi Rantanen challenges conventional ways of thinking about globalization and shows how it cannot be understood without studying the role of the media Rantanen begins with an accessible overview of globalization and the pivotal role of the media

Communication Theory David Holmes, 2005-04-23 This is a very clear and concise summary of media studies present and future There is no other book that can both be used as a teaching tool and can help scholars organize their thinking about new media as this book can Steve Jones University of Chicago This book offers an introduction to communication theory that is appropriate to our post broadcast interactive media environment The author contrasts the first media age of broadcast with the second media age of interactivity Communication Theory argues that the different kinds of communication dynamics found in cyberspace demand a reassessment of the methodologies used to explore media as well as new understandings of the concepts of interaction and community virtual communities and broadcast communities The media are examined not simply in terms of content but also in terms of medium and network forms Holmes also explores the differences between analogue and digital cultures and between cyberspace and virtual reality The book serves both as an upper level textbook for New Media courses and a good general guide to understanding the sociological complexities of the modern communications environment
