Healthcare Simulation: Improving Healthcare Systems Ellen S. Deutsch, Shawna J. Perry, Harshad G. Gurnaney, 2021-07-22 This book presents simulation as an essential powerful tool to develop the best possible healthcare system for patients. It provides vital insights into the necessary steps for supporting and enhancing medical care through the simulation methodology. Organized into four sections, the book begins with a discussion on the overarching principles of simulation and systems. Section two then delves into the practical applications of simulation, including developing new workflows, utilizing new technology, building teamwork, and promoting resilience. Following this, section three examines the transition of ideas and initiatives into everyday practices. Chapters in this section analyze complex interpersonal topics such as how healthcare clinical stakeholders, simulationists, and experts who are non-clinicians can collaborate. The closing section explores the potential future directions of healthcare simulation, as well as leadership engagement. A new addition to the Comprehensive Healthcare Simulation Series, *Improving Healthcare Systems* stimulates the critical discussion of new and innovative concepts and reinforces well-established and germane principles.

STEM Education Approaches and Challenges in the MENA Region Alhashem, Fatimah, Pacheco-Guffrey, Heather, Boivin, Jacquelynne Anne, 2023-08-03 In the Middle East and North Africa (MENA) region, recent long-term policy plans emphasize the ever-increasing need to transition to 21st-century skills and achieve sustainable development goals by preparing highly qualified nationals with credentials in STEM fields relevant to the current and future needs of the labor market. Yet, despite multiple educational reforms and substantial resources, national and international indicators of student performance still demonstrate insignificant improvement in MENA students' achievement in STEM subjects. *STEM Education Approaches and Challenges in the MENA Region* contributes to the existing STEM literature by exploring factors that influence student participation in STEM in MENA countries. The book also identifies the gaps in STEM education research in MENA countries and presents the current practices and challenges. Covering key topics such as gender equity, school administration, and education systems, this premier reference source is ideal for administrators, policymakers, researchers, scholars, academicians, practitioners, instructors, and students.
