Governing Financial Globalisation:

Governing Financial Globalization Andrew Baker, David Hudson, Richard Woodward, 2005-02 This volume provides a wide ranging discussion of both the potential and the problems arising from the application of multi level governance literature to the monetary and financial domain

3-in-1: Governing A Global Financial Centre Jun Jie Woo, 2017-06-21 3 in 1 Governing a Global Financial Centre provides a comprehensive understanding of Singapore's past development and future success as a global financial centre It focuses on three transformational processes that have determined the city state's financial sector development and governance globalisation financialisation and centralisation and their impacts across three areas the economy governance and technology More importantly this book takes a multidimensional approach by considering the inter related and interdependent nature of these three transformational processes Just like the 3 in 1 coffee mix that is such an ubiquitous feature of everyday life in Singapore the individual ingredients of Singapore's success as a global financial centre do not act alone but as an integrated whole that manifests itself in one final product the global financial centre

Governing Financial Globalization Andrew Baker, David Hudson, Richard Woodward, 2005-02-01 Money finance and credit are literally the lifeblood of the modern economy The distribution of money and credit are essential to productive investment in trade and industry to the maintenance of consumer purchasing power and demand to individuals social status and standard of living and ultimately to public order This important new volume provides a wide ranging discussion of both the potential and the problems arising from the application of multi level governance literature to the monetary and financial domain The contributors achieve this through a range of case studies and conceptual discussions of the issues raised by financial and monetary governance acknowledging that multi level governance has to take the form of a framework which recognizes a fluid range of scales and the significance of non formal institutional and social nodes of authority

Financial Globalisation, Governance and the Evolution of the Home Bias Bong-Chan Kho, René M. Stulz, Francis E. Warnock, 2006 Despite the disappearance of formal barriers to international investment across countries we find that the average home bias of US investors towards the 46 countries with the largest equity markets did not fall from 1994 to 2004 when countries are equally weighted but fell when countries are weighted by market capitalisation This evidence is inconsistent with portfolio theory explanations of the home bias but is consistent with what we call the optimal insider ownership theory of the home bias Since foreign investors can only own shares not held by insiders there will be a large home bias towards countries in which insiders own large stakes in corporations Consequently for the home bias to fall substantially insider ownership has to fall in countries where it is high Poor governance leads to concentrated insider ownership so that governance improvements make it possible for corporate ownership to become more dispersed and for the home bias to fall We find that the home bias of US investors decreased the most towards countries in which the ownership by corporate insiders is low and countries in which ownership by corporate insiders fell Using firm level data for Korea we find

that portfolio equity investment by foreign investors in Korean firms is inversely related to insider ownership and that the firms that attract the most foreign portfolio equity investment are large firms with dispersed ownership

Governing Globalization Deepak Nayyar, 2002-07-18 It is now more than fifty years since the United Nations system and the Bretton Woods institutions were created The world has changed since then and so have its governance needs in terms of institutions and rules It is time to think about the contours of institutions and governance that would meet the needs of the world economy and also polity at least for the first quarter of the twenty first century This book is among the first to examine the subject in depth The study is divided into four parts The first situates the subject in the wider context of globalization which has shaped development in the world economy affected the living conditions of people and constrained the role of nation states The international context and the national setting are explored The second part analyses some issues of emerging significance in the contemporary world such as global macroeconomic management transnational corporations international capital flows and cross border movements of people to suggest that there are some missing institutions which are needed The third part provides a critical evaluation of the existing institutions in retrospect with a focus on the UN the IMF the World Bank and the WTO It analyses how existing rules need to be modified or existing institutions need to be restructured to meet the present and future needs of global governance The fourth part explores some important elements of governance which are critical for any vision of the future It suggests some changes in existing institutions and points to emerging governance needs where new institutions may have to be created This authoritative volume will be of value to readers with an interest in international economics development economics and international relations It will also be of value to practitioners both policy makers and diplomats concerned with problems of global governance and should become the standard reference on the subject

The European Union and Global Financial Regulation Lucia Quaglia, 2014 1 Introduction 2 The State of the Art and the Research Design 3 The EU and Global Banking Regulation 4 The EU and Global Securities Markets Regulation 5 The EU and Global Insurance Regulation 6 The EU and International Accounting and Auditing Standards 7 An Overall Cross sectoral Assessment Over Time 8 Conclusions

Global Financial Networked Governance Peter Knaack, 2022-12-30 Global Financial Networked Governance provides a careful analysis of the Financial Stability Board FSB and the standard setters under its umbrella to show how such government networks harness the power of public reputation to herd their members into compliance The FSB s track record in coordinating global financial regulatory reform is uneven Some items on its agenda have seen the rapid evolution of globally coordinated regulatory standards and their implementation by all member states sometimes even ahead of the stipulated timelines In contrast other initiatives have stalled at different stages of the policymaking process global coordination is lacking deadlines have been missed and it is currently unclear when the post crisis financial reform project will come to completion if ever In this book the author asks the question why has the FSB succeeded in some areas of its global financial regulatory coordination work and not in others The

book traces the global policymaking process in three major issue areas banking regulation Basel III over the counter OTC derivatives and ending too big to fail Through a combination of careful process tracing and rigorous testing against alternative explanations it challenges the existing literature by revealing that the institutional pathway of policymaking is the main predictor of FSB progress It shows that government networks on their own have succeeded in implementing globally coherent safety standards In contrast legislation and legislators in key G20 countries have limited the power and effectiveness of the FSB The author analyzes the causes and effects of this phenomenon and suggests a novel institutional solution to the effectiveness legitimacy dilemma that global governance forums face combining the advantages of functional specialization and electoral accountability This book will be of great interest to graduate students academics working at the intersection of economics political science and international law students of the FSB in particular and policymakers in global economic governance

Governing Globalization Deepak Nayyar,2002 It is now more than fifty years since the United Nations system and the Bretton Woods institutions were created The world has changed since then and so have its governance needs in terms of institutions and rules It is time to think about the contours of institutions and governance that would meet the needs of the world economy and also polity at least for the first quarter of the twenty first century This book is the first to examine the subject in depth

Governing the Global Economy Ethan B. Kapstein,1994 This text examines the actions that governments have taken to cope with the economic and political consequences associated with the globalization of international finance Topics covered include the Third World debt crisis and the collapse of the Bank of Credit and Commerce International BCCI

Globalisation and Governance Henk Overbeek,2002

The Third World in the Global Governance System Martin Hvidt,Morten Ougaard,2003

Governing International Labour Migration Christina Gabriel,Hélène Pellerin,2008 This book offers a critical examination of the way in which the nature and governance of international labour migration is changing within a globalizing environment It examines how labour mobility and the governance of labour migration are changing by exploring the links between political economy and differentiated forms of labour migration Additionally it considers the effects of new social models of inclusion and exclusion on labour migration Therefore the book troubles the conventional dichotomies and categorizations permanent vs temporary skilled vs unskilled legal vs illegal that have informed migration studies and regulatory frameworks Theoretically this volume contributes to an ongoing project of reframing the study of migration within politics and international relations Bringing together an interdisciplinary group of scholars drawing on examples from the European Union North America and Asia

Governing International Labour Migration will be of interest to students and scholars of migration studies IPE international relations and economics

The New Electronic Marketplace George Christou,Seamus Simpson,2007 This book breaks new ground by exploring governance strategies that the EU has been developing over the last decade for the growing electronic economy driven by the Internet Through an analysis of key EU policy initiatives the authors provide an explanation of both the form

and mechanics of emergent governance arrangements within the European economy Drawing on data gathered through interviews with key national and EU level policymakers the volume applies theoretical insights from academic work on the regulatory and post regulatory state to situate and explain the EU s role as an international regional actor in a new area of economic activity with important national and global dimensions The New Electronic Marketplace will be important reading for academics students and policymakers interested in the politics of new electronic communications regulation communications policy EU governance and international political economy The book will interest the Internet policy community including officials at national and EU level those working in national regulatory authorities and Internet telecoms and other ICT professionals in the private sector

The Politics of the New International Financial Architecture Susanne Soederberg, 2004-11 Recent years have witnessed a veritable epidemic of financial crises from Mexico through South East Asia Russia Brazil and now Argentina The rich industrial countries led by the United States have had to respond This book examines the G7 s attempts over the past decade to re establish rules and a degree of order in the world financial system through the creation of the Financial Stability Forum and the G20 which they are calling the New International Financial Architecture Susanne Soederberg asks Why has the New International Financial Architecture emerged At whose initiative What does it involve What are the underlying power relations Who is benefiting Will it really work The author argues however that this tinkering with the capitalist system will not achieve either sustained economic growth or stability in financial markets let alone enhance the capability of developing countries to tackle the problems of mass poverty and social injustice

Corporate Governance in Australia and New Zealand John Hynes Farrar, 2001 This book provides a comprehensive look at the laws and practice of corporate governance in an international setting with particular reference to Australia and New Zealand
