Grammatical Structures Of English And German:

Basic structural differences within a linguistic comparison of English and German grammar Theresa Schmidt, 2010-03-01 Seminar paper from the year 2006 in the subject English Language and Literature Studies Comparative Literature grade 1.7 http://www.uni-jena.de/Institut_f_r_Anglistik_Amerikanistik/course/HpS/Contrastive_Linguistics/language/English/abstract Introduction Since German and English both belong to the same family of languages i.e. West Germanic they are at least from an historical point of view closely related languages. By investigating their respective grammatical structures it is to be discussed whether the existing structural contrasts between English and German grammar are related as well. Within this paper the most general and basic of the occurring differences will be summarised and analysed by taking John Hawkins' *A Comparative Typology of English and German: Unifying the Contrasts* as a basic source. Hawkins argues that where German and English contrast the latter tends to show less correspondence between form and meaning. This is due to his central hypothesis which says that it is possible to establish general principles which unite the major contrasts between both languages. cf. 4 Hawkins assumes that the differences within the grammatical structures are not accidental ones; they are rather systematic and can be traced back to one ultimate trigger. 5 in the history of the English language phonological changes which caused all further structural differences as either direct or indirect consequences of this process. cf. 5-7 The attempt of this paper is to draw conclusions from this knowledge of the common historical background and apply it to the modern versions of the German and English language and the major patterns of variation. To get a descriptive and lucid image of the contrasts between the two languages we first start on the level of individual words by considering their morphological structure i.e. we will examine the inflection of the verb and the case marking of noun phrases. This will lead us directly to questions concerning word order and basic grammatical relations on the syntactical level. Finally a short analysis of verb first structures in English and German will round off the discussion.

Stockwell, J. Donald Bowen, John W. Martin, 1965-06-15 This series is designed to provide a detailed account of one of the major problems in the teaching of a second language the interference caused by structural differences between the native language of the learner and the foreign language he is studying The similarities and differences between English and the language being taught are described in two volumes one on the sound systems and one on the grammatical systems for some of the foreign languages most in demand in the United States today *A Short Comparative Grammar of English and German* Victor Henry, 1894

Calude, Laurie Bauer, 2021-09-30 Despite a history of hundreds of years of research analysing aspects of English grammar there are still open problems which continue to baffle language researchers today Such grammar mysteries arise for a number of reasons because the language is changing because different speakers of the language adhere to distinct norms and thus introduce and maintain variation in the system because there are differences between the grammar of spoken and written English This book illuminates some of the complexities of the subject the areas where new discoveries await and why it matters Through a series of accessible and engaging case studies on various aspects of grammar from multiple negation to possession the authors present grammar as an intellectual challenge This book brings out into the open questions about language usage to which we still do not have good answers in a bid to make variation overt and to revel in the mystery of the English language Both aimed at the interested general reader and the beginning student of English language and linguistics this is a fresh take on grammar
