volume takes stock of contemporary perspectives on gender and crime In 1975 Freda Adler published her pathbreaking book *Sisters in Crime: The Rise of the New Female Criminal* She made the bold claim that changes in American society including changing attitudes and opportunities would allow for greater participation of women in criminal enterprises Beyond her substantive thesis which turned out to be partially accurate Adler opened up a vibrant new area within criminology the study of gender and crime Now nearly a half century later the field of criminology is replete with women scholars who are making plentiful and important contributions As a result this volume explores cutting edge issues Part I starts by laying out a theoretical foundation focusing on the origins of theories of female criminality and then providing an overview of more contemporary perspectives Part II explores the role of race in shaping women's criminality drawing on the novel approaches of Black Criminology and the study of intersectionality Part III gives attention to issues that heretofore were male centric illuminating female desistance from crime the effects of peer groups and gender differences in attitudes toward criminal justice policies Finally Part IV considers the explanation of three important realms of criminality risky lifestyles white collar crime and terrorism This volume will be of interest to a wide range of criminologists and is an ideal choice for use in graduate seminars and upper level undergraduate courses

Women and the Criminal Justice System Katherine S. Van Wormer, Clemens Bartollas, 2007 This text examines the various roles of women in the criminal justice system against a social context in which women are oppressed The text examines the following three roles of women in criminal justice Women as victims of crimes Women as criminals convicted and sentenced for crimes Women as workers in various agencies in the criminal justice system This text emphasizes content on gender and ethnic diversity and on the strengths of oppressed people especially women of color A wide range of issues are covered including the rate of early

childhood sexual abuse victimization in female inmates priest abuse of girls female inmate rape by male prison guard and obstacles for women lawyers achieving partnerships in their firms The authors provide a wealth of recent data drawn from both domestic and international human rights sources as well as from personal interviews The final portion of the text describes women's setbacks in entering the traditionally male dominated fields of policing the law and corrections if people are given half a chance they can draw on their own resources to heal from the past and build for the future This empowerment approach is already prominent in the social work field and widely used in victim treatment programs for working with female offenders

Routledge International Handbook of Crime and Gender Studies Claire

Renzetti, Susan Miller, Angela Gover, 2013-05-02 Criminological research has historically been based on the study of men boys and crime As a result the criminal justice system's development of policies programs and treatment regimes was based on the male offender It was not until the 1970s that some criminologists began to draw attention to the neglect of gender in the study of crime but today the study of gender and crime is burgeoning within criminology and includes a vast literature The Routledge International Handbook of Crime and Gender Studies is a collection of original cutting edge multidisciplinary essays which provide a thorough overview of the history and development of research on gender and crime covering topics based around theoretical and methodological approaches gender and victimization gender and offending gendered work in the criminal justice system future directions in gender and crime research Alongside these essays are boxes which highlight particularly innovative ideas or controversial topics such as cybercrime restorative justice campus crime and media depictions A second set of boxes features leading gender and crime researchers who reflect on what sparked their interest in the subject This engaging and thoughtful collection will be invaluable for students and scholars of criminology sociology psychology public health social work cultural studies media studies economics and political science

Researching Theories of Crime and Deviance Charis Elizabeth Kubrin, Thomas Dain Stucky, Marvin D. Krohn, 2009 This new book from noted criminologists Charis Kubrin Thomas Stucky and Marvin Krohn is a unique supplement for criminological theory courses graduate level research methods courses or seminars that take a close look at the development of criminological theory and or methods This book is intended to bridge the gap between theory and research in the study of crime and deviant behavior There are a number of textbooks that provide excellent summaries of criminological theories Many of these include critiques of the theories discussing the empirical evidence that has been rendered in support or not of those theories However empirical evidence is only as good as the research methods that were used to generate it Theory texts do not critically evaluate the research methods that generate the findings they cite The student therefore obtains an impression of the utility of the theory based on an uncritical assessment of the research evidence The purpose of this book is to explicitly assess the research methods that have been used to test nine theoretical perspectives of crime Specifically the authors focus on sampling measurement and analytical issues in doing theoretically directed research

Gender, Crime and Victimization

Pamela Davies, 2010-11-15 *Gender Crime and Victimization* is a thoughtful and thought provoking book exploring gender patterns in both offending and victimisation. It offers a thorough examination of how these patterns in society are variously established and represented, researched, explained and responded to by policy makers and criminal justice agencies. Bringing together key theory, research and policy developments, the book combines perspectives on the study of criminology with those of victimology and gender studies, drawing particularly on the influence of feminism. It analyses processes of criminalisation and social control and their structural biases. It explores fears, anxieties and worries about crime as well as particular vulnerabilities to crime. The book employs a range of learning devices to support the student reader including:

- o Chapter overviews
- o Case studies and examples
- o Study questions
- o Further reading at the end of each chapter
- o A comprehensive glossary
