## Future War:

Fighting the Future War Frederic Krome, 2012-03-22 The period between World War I and World War II was one of intense change Everything was modernizing including our technology for making war witness machine guns trench warfare biological agents and ultimately The Final Solution This modernization and eye toward the future was reflected in many facets of pop culture including fashion home wear design and the popular literature of the time In sci fi a specific genre emerged that of the future war Fred Krome has collected many of these future war stories together for the first time in Fighting the Future War Bolstered by a comprehensive introduction and introduced with historical information about both the authors of the stories and the historical time period these stories provide a view into the field of pulp science fiction writing the issues that informed the time period between the world wars and the way people envisioned the wars of tomorrow Revealing anxieties about society technology race and politics the genre of the future war story is important material for students of history and literature

Latiff, 2018-09-18 An urgent prescient and expert look at how future technology will change virtually every aspect of war as we know it and how we can respond to the serious national security challenges ahead Future war is almost here battles fought in cyberspace biologically enhanced soldiers autonomous systems that can process information and strike violently before a human being can blink A leading expert on the place of technology in war and intelligence Robert H Latiff now teaching at the University of Notre Dame has spent a career in the military researching and developing new combat technologies observing the cost of our unquestioning embrace of innovation At its best advanced technology acts faster than ever to save the lives of soldiers at its worst the deployment of insufficiently considered new technology can have devastating unintended or long term consequences The question of whether we can is followed all too infrequently by the question of whether we should In *Future War* Latiff maps out the changing ways of war and the weapons technologies we will use to fight them seeking to describe the ramifications of those changes and what it will mean in the future to be a soldier He also recognizes that the fortunes of a nation are inextricably linked with its national defense and

how its citizens understand the importance of when how and according to what rules we fight What will war mean to the average American Are our leaders sufficiently sensitized to the implications of the new ways of fighting How are the attitudes of individuals and civilian institutions shaped by the wars we fight and the means we use to fight them And of key importance How will soldiers themselves think about war and their roles within it The evolving complex world of conflict and technology demands that we pay more attention to the issues that will confront us before it is too late to control them Decrying what he describes as a broken relationship between the military and the public it serves Latiff issues a bold wake up call to military planners and weapons technologists decision makers and the nation as a whole as we prepare for a very different future
