**Stephen Erfle**

## **First Time Around:**

**Munsey's Magazine for ...** ,1922      **Electronic String Art** Stephen Erfle,2024-02-20 String art is a well known and popular activity that uses string a board and nails to produce artistic images although there are variations that use different modalities This activity is beloved because simple counting rules are used to create beautiful images that can both adorn walls and excite young minds The downside of this highly tactile activity is that it is quite time consuming and rigid By contrast electronic string art offers much more flexibility to set up or change nail locations and counting rules and the images created from those changes change instantaneously Electronic String Art Rhythmic Mathematics invites readers to use the author s digital resources available on the ESA website to play with the parameters inherent in string art models while offering concise accessible explanations of the underlying mathematical principles regarding how the images were created and how they change Readers will have the opportunity to create visually beautiful works of art while learning concepts from geometry number theory and modular arithmetic from approximately 200 short interdependent sections Features Readers are able to drill down on images in order to understand why they work using short 1 to 2 page stand alone sections Sections are lessons that were created so that they could be digested in a single sitting These sections are stand alone in the sense that they need not be read sequentially but can be referred to based on images that the reader finds interesting An open ended inherently flexible teaching resource for elementary middle and high school level mathematics The most mathematically challenging sections or portions of a section are designated MA and may not be accessible to elementary and middle school readers Will be appreciated by anyone interested in recreational mathematics or mathematical artworks even if the users are not interested in the underlying mathematics Includes exercises solutions and many online digital resources These QR codes take you to these digital resources One takes you directly to the web version of the string art model used as a starting point for teaching the parameters of the model in Section 25 5 The other takes you to the ESA web page with additional links to a variety of resources      **First Time's a Yarn** Becky Klauer,2023-03-31 Breezy Marston is almost 30 and doing her best to re rail her derailed life plan After losing the job she thought she would hold until she was old and decrepit her best friend Ammyleigh throws out an idea for them to start their own business making homemade crochet items As they are working on getting that off the ground Breezy gets a phone call that she has to go pick up her youngest sibling Oona who is 15 and getting released early from juvie Now she is expected to be responsible for Oona in all areas of work school and home life Then she also ends up with Juniper Oona s friend from juvie More expectations After they find Juniper s ex boyfriend and his older brother dead Russian bad guys start chasing them Breezy finds out she is some kind of sleeper agent for a government experiment and oh she can talk with ghosts Can she and her group figure out who killed the two boys before an angry Russian or ghost gets to her first      **Sexual Bargaining in the Digital Era** John H. Scanzoni,2021-10-05 Sexual Bargaining in the Digital Era follows the evolution of genders sexualities and so on away from

their Old Normal ON pattern which prevailed during the Agricultural Age and the Industrial Age and into the New Normal NN pattern which is currently surfacing in concert with an emerging Digital Era ON was based on the ancient traditional script governing how women men children ought to behave within the spheres of genders marriages families relationships sexualities Over the centuries ON eventually modified into the familiar 1950s style nuclear patriarchal cisgender husband wife with children and family And now that style itself is fading away into NN NN is based not on script but on improvisation it is essentially a continual work in progress To make it function the partners engage in ongoing negotiation governed by the principle that everything is negotiable except the principle that everything is negotiable NN has thus far been pursued most frequently by persons New Lights who are educated and relatively advantaged ON has been pursued mostly by persons Old Lights who are less educated and relatively less advantaged ON is also strongly embraced by persons of a traditional religious bent persons who tend to be rigid and unbending in their religious views Currently they tend to be extremely right wing evangelicals and extremely right wing Catholics Importantly their political clout far exceeds their relatively modest numbers within the larger population In brief the shift from ON to NN is a move away from the sanctity of a particular structure to the primacy of persons engaged in ongoing processes of inventing and reinventing certain arrangements of genders marriages families relationships sexualities enabling them to fulfil their needs for primary intrinsic emotional satisfactions such as liking loving empathy companionship sexual and so forth Among other things this shift replaces the preeminence of the historic binary or cisgender approach heterosexual legal children and so on in favor of the diversity variety multiplicity approach which incorporates under one conceptual umbrella all persons of whatever genders sexualities and so on All persons are thus engaged in a common struggle to achieve personal satisfactions as well as contribute to the Greater Good

**GUIDE BOOK TO PLANNING - A COMMON SENSE APPROACH** Robert M. Donnelly, 2006-05-24 Any book on planning has to be easy to read and full of examples on how to do it with forms and illustrations That is exactly what this book is and why it is called a guidebook The fact that most people do not plan well is well documented by the demographics of the population and the economic situation that a growing senior population is faced with now due to poor planning or no planning earlier in their lives Since company s are run by people they exhibit the idiosyncrasies of the people who run them Many company s do not have strategic plans or operating plans Some firms do not even have a budget and operate on a day by day basis The obvious result of this is crisis management cash flow problems and the constant risk of going out of business Many company s both large and small have disappeared due to the lack of a plan and this has been well documented in the business press Managers do not have a plan for their business because they do not have a plan for themselves Planning is not something that we are born with a natural ability to do well or in many cases at all Planning is a learned skill and there is a need for simple step by step guides which is what this book is about It has been written as a result of years of experience that the author has had working with hundreds of company s The foundation for the book is a process

that the author calls the Plan for Planning a five step exercise that he has used to help managers build business plans for their company s It is a proven formula that has resulted in increased profitability operational efficiencies and the optimization of the overall allocation of resources for the author s clients It also has been the basis for the development of executive level seminars by the author that have been promoted and implemented by BUSINESS WEEK and Inc Magazine domestically and Frost Sullivan internationally The initial publication of this book was by Inc as a result of the success of the seminar series for their audience growing firms Articles have been written about the Plan for Planning process and it has been instrumental in the development of business plans that have resulted in company s being sold for a premium to the shareholders as a result of the quality of the business planning process The book has been used by many managers and in some cases continues to be a reference guide for the new businesses that they have become involved with It is really an easy to use guide for developing a business strategic plan for any business **Ainslee's** ,1904 **Forest and Stream** ,1906
