Goods And Services:

What Are Goods and Services? Carolyn Andrews,2008-08-15 This colorful book will help young readers understand the concepts of goods and services so that they recognize their role in the cycle commerce The concepts of producers and consumers are also carefully explained in a manner children will understand and enjoy **Ecosystem Goods and Services**

from Plantation Forests Jürgen Bauhus,Markku Kanninen,Peter van der Meer,2010 Plantation forests often have a negative image They are typically assumed to be poor substitutes for natural forests particularly in terms of biodiversity conservation carbon storage provision of clean drinking water and other non timber goods and services Often they are monocultures that do not appear to invite people for recreation and other direct uses Yet as this book clearly shows they can play a vital role in the provision of ecosystem services when compared to agriculture and other forms of land use or when natural forests have been degraded This is the first book to examine explicitly the non timber goods and services provided by plantation forests including soil water and biodiversity conservation as well as carbon sequestration and the provision of local livelihoods The authors show that if we require a higher provision of ecosystem goods and services from both temperate and tropical plantations new approaches to their management are required These include policies methods for valuing the services the practices of small landholders landscape approaches to optimise delivery of goods and services and technical issues about how to achieve suitable solutions at the scale of forest stands While providing original theoretical insights the book also gives guidance for plantation managers policy makers conservation practitioners and community advocates who seek to promote or strengthen the multiple use of forest plantations for improved benefits for society Published with CIFOR
