In 1998 Deborah Burford and her husband David loaded their cars and trailer with their belongings along with four cats, two dogs and one ferret and departed New Jersey for a new home in the North Georgia mountains. In *Love from the Mountains* Deborah shares a compilation of her weekly columns originally published in *The North Georgia News* and *The Towns County Herald* bringing to life the humorous voices of the animals both wild and domestic who share the woods with her. There's a squirrel named Howard who taunts Miss Adventure the cat with unsavory language, there's Mangefur the opossum who develops a taste for high priced birdseed and Bosley and Cosette the miniature poodles who possess an insatiable appetite for puddle surfing. Exploring the entertaining world of nature Deborah includes amusing anecdotes about a hungry bear with an eclectic appetite, a ferret who likes women's toes and four mutt cats who rely on their patience to torment other animals crazy enough to traipse into their environment. The true animal stories in *Love from the Mountains* prove that the furry creatures who share our world with us really do have opinions on just about everything we humans do. **Veterinary Forum**, 1998.

Dubin, 2012-12-06. *Studies in Consumer Demand* Econometric Methods Applied to Market Data contains eight previously unpublished studies of consumer demand. Each study stands on its own as a complete econometric analysis of demand for a well defined consumer product. The econometric methods range from simple regression techniques applied in the first four chapters to the use of logit and multinomial logit models used in chapters 5 and 6 to the use of nested logit models in chapters 6 and 7 and finally to the discrete continuous modeling methods used in chapter 8. Emphasis is on applications rather than econometric theory. In each case enough detail is provided for the reader to understand the purpose of the analysis, the availability and suitability of data and the econometric approach to measuring demand.
