 Chung-Chun Yang, Sheng Gong, 1993 Today there is increasing interest in complex geometry geometric function theory and  
 integral representation theory of several complex variables The present collection of survey and research articles comprises  
 a current overview of research in several complex variables in China Among the topics covered are singular integrals  
 function spaces differential operators and factorization of meromorphic functions in several complex variables via analytic or  
 geometric methods Some results are reported in English for the first time Asian Mathematical Conference, 1990 -

*Factorization Theory of Meromorphic Functions* , In this thesis we shall prove some results which in turn will allow us to  
 solve some factorization problems in a systematic way Also we shall utilize new methods from theory of complex analytic sets  
 and local holomorphic dynamics to solve some factorization problems In Chapter 3 by using an extended version of  
 Steinmetz's theorem we prove that certain class of meromorphic functions is pseudo prime Hence we can prove that under  
 certain conditions  $R(z)H(z)$  is pseudo prime where  $R(z)$  is a non constant rational function and  $H(z)$  is a finite order periodic  
 function In Chapter 4 we try to find out all possible factorizations of  $p(z)H(z)$  when  $H$  is an exponential type periodic function  
 and  $p$  is a non constant polynomial This confirms a conjecture of G D Song and C C Yang In Chapter 5 we shall use results  
 from theory of complex analytic sets to prove certain criteria on the existence of a non linear entire common right factor of  
 two entire functions Applying these criteria we can then prove that if  $f$  is an entire function which is pseudo prime and not of  
 the form  $H(z)Q(z)$  where  $H$  is a periodic entire function and  $Q$  is a polynomial then  $Rf(z)$  is also pseudo prime for any non  
 constant rational function  $R$  This result essentially solves a problem of G D Song and is a fundamental property of pseudo  
 prime function We also give other applications of these criteria to unique factorization problems In Chapter 6 we consider  
 the unique factorization problems of  $f \circ p$  and  $p \circ f$  where  $f$  is a prime transcendental entire function and  $p$  is prime  
 polynomial We shall use methods from local holomorphic dynamics to solve these problems **Analytic Function Theory of**
