Debra A. Miller

Factory Farming:

Factory Farming Debra A. Miller, 2010 Factory farms produce 99.9 percent of chickens, 95 percent of pigs and 78 percent of cattle sold in the United States. This book contains essays that offer a variety of perspectives on the issue of factory farming, debating whether factory farming is economically beneficial, ethical, or harmful to human health or the environment, and considering the future of the industry.

Culture Wars Roger Chapman, 2010 Although openness and inclusion are cornerstones of life in the United States, intolerance and reactionary politics are also very real. As the nation prepares to elect a new president, *The Culture Wars* addresses the key defining issues of contemporary **Transformation**.

Leah Garcés, 2024-09-17 The story of factory farmers, rescued farm animals, and rural communities standing up to big corporations and constructing their own new world that will change the way we eat. In *Transformation*, president and CEO of Mercy For Animals Leah Garcés explains how food and farming policies have failed over decades and offers insights into the wave of change coming from a new crop of farmers and communities who are constructing a humane and sustainable farming system. Factory animal farming faces an abundance of issues, from environmental concerns and animal cruelty to exploited farmers and poor working conditions, and more and more farmers are searching for a way out and for a new start. Using insights from interviews and fieldwork, Garcés shares the perspectives of three groups: Farmers, such as the Halley farm where a family crushed by chicken factory farming builds a new way by transitioning their farm to growing hemp and rescuing dogs; Animals, like Norma, an industrial dairy cow who was sentenced to death after injuring a worker in an effort to protect her calf; and Farm communities, including stories like how the hog industry in North Carolina preys on historically Black communities by contaminating the air and water for decades with hog pollution. Garcés demonstrates the reasons why we must end factory farming and calls on readers to imagine a future world where *Transformation* is complete and we have transitioned to a just food and farming system.

Social Problems Donileen R. Loseke, Joel Best, 2017 This collection of focused essays is directed at several levels of students of social problems. It is accessible to the uninitiated who are not familiar with the constructionist literature and aimed at those who are not particularly interested in subtle theoretical and empirical issues of concern to academics studying social problems from constructionist perspectives. Some readings focus on the construction of problems by scientists and other professionals; others examine the work of social activists, mass media, and social service personnel. Among the topics included are studies of social inequalities and individual deviance; a comparison of the images of social problems in the United States with those in other countries; and an examination of the importance of politics and power in constructing public images of social problems. Constructionist perspectives have become the leading theoretical approach for sociology and allied fields in studying social problems. Yet constructionists' impact on the teaching of social problems has been far less dramatic. Undergraduate courses on social problems are often subject to a theoretical barrage of eclectic perspectives. Just as the first social problems textbooks did almost a century ago, textbooks continue to

present a series of unrelated chapters each devoted to a particular social problem Social Problems is an effort at systematic analysis rather than random thought on the subject Social Problems presents detailed case studies demonstrating how constructionist perspectives can actually be applied to understand particular social problems While these articles can be read alone the editors have organized these selections to correspond with the chapter topics in the second edition of Donileen Loseke s Thinking about Social Problems an accessible introduction to constructionist approaches At the same time some instructors who use this edited collection might wish to provide their own mix to the selection process Many of the contributions make multiple points and so reasonably could be used to illustrate other basic texts or classic studies in the field of social problems Donileen R Loseke is professor of sociology at the University of South Florida Joel Best is professor and chair Department of Sociology and Criminal Justice University of Delaware He has also served as an advisory editor for Aldine in the area of social problems

The SAGE Encyclopedia of Food Issues Ken Albala,2015 The SAGE Encyclopedia of Food Issues explores the topic of food across multiple disciplines within the social sciences and related areas including business consumerism marketing and environmentalism In contrast to the existing reference works on the topic of food that tend to fall into the categories of cultural perspectives this carefully balanced academic encyclopedia focuses on social and policy aspects of food production safety regulation labeling marketing distribution and consumption A sampling of general topic areas covered includes Agriculture Labor Food Processing Marketing and Advertising Trade and Distribution Retail and Shopping Consumption Food Ideologies Food in Popular Media Food Safety Environment Health Government Policy and Hunger and Poverty This encyclopedia introduces students to the fascinating and at times contentious and ever so vital field involving food issues

Animal Machines Ruth Harrison,2013 First published in 1964 Ruth Harrison s book Animal Machines had a profound and lasting impact on world agriculture public opinion and the quality of life of millions of farmed animals Concerned with welfare standards at a time when animal production was increasing in scale and mechanization Ruth Harrison set about investigating the situation in a fair and even handed way Reporting her findings in this book Harrison alerted the public to the undeniable suffering of calves living in veal crates and birds in battery cages Written at the beginning of the intensive farming movement which promised progress but in reality worsened conditions for domesticated animals Animal Machines provides a fascinating insight into the system we are living with today and must continue with as the global population increases Harrison s work brought about legal reforms a greater understanding of farm conditions for animals and increased public awareness Animal Machines is reprinted here in its entirety accompanied by new chapters by world renowned experts in animal welfare discussing the legacy and impact of Animal Machines 50 years on

Righteous Porkchop Nicolette Hahn Niman,2009-05-19 Nicolette Hahn Niman a crusading environmental activist vegetarian and lawyer blows the lid off the shocking practices in the pork meat and poultry industries in Righteous Porkchop Niman gives students both a searing account of an industry gone awry and a practical guide for living a more sustainable lifestyle

detailing both why and how to choose meat poultry dairy eggs and fish from traditionally farmed sources Righteous Porkchop chronicles Niman's investigation into the practices of the meat industry that caused her to lock horns with the big business farming establishment This battle feeds her determination to organize a national reform movement to fight the shocking practices of industrial animal operations Righteous Porkchop is a searing and utterly convincing indictment of modern meat production The book also brims with hope and charts a practical and even beautiful path out of the jungle Michael Pollan author of Omnivore's Dilemma and In Defense of Food

Is Factory Farming Harming America? Stuart A. Kallen, 2006 Offers the reader not only a full spectrum of dissent on factory farming but also the ability to test the validity of arguments by following up on sources used as evidence

Farm Sanctuary Gene Baur, 2008-03-04 Leading animal rights activist Gene Baur examines the real cost of the meat on our plates for both humans and animals alike in this provocative and thorough examination of the modern farm industry Many people picture cows sheep pigs and chickens as friendly creatures who live happily within the confines of a peaceful family farm arriving as food for humans only at the end of their sun-drenched lives That's what Gene Baur had been told but when he first visited a stockyard he realized that this rosy depiction couldn't be more inaccurate Amid the stench noise and filth his attention was drawn in particular to one sheep who had been cast aside for dead But as Baur walked by the sheep raised her head and looked right at him She was still alive and the one thing Baur knew for sure that day was that he had to get her to safety Hilda as she was later named was nursed back to health and soon became the first resident of Farm Sanctuary an organization dedicated to the rescue care and protection of farm animals The truth is that farm production does not depend on the family farmer with a small herd of animals but instead resembles a large assembly line factory Animals raised for human consumption are confined for the entirety of their lives and often live without companionship fresh air or even adequate food and water Viewed as production units rather than living beings with feelings ten billion farm animals are exploited specifically for food in the United States every year In Farm Sanctuary Baur provides a thought-provoking investigation of the ethical questions involved in the production of beef poultry pork milk and eggs and what each of us can do to stop the mistreatment of farm animals and promote compassion He details the triumphs and the disappointments of more than twenty years on the front lines of the animal protection movement And he introduces sanctuary us to some of the special creatures who live at Farm Sanctuary from Maya the cow to Marmalade the chicken all of whom escaped horrible circumstances to live happier more peaceful lives Farm Sanctuary shows how all of us have an opportunity and a responsibility to consume a kinder plate making a better life for ourselves and animals as well You will certainly never think of a hamburger or chicken breast the same way after reading this book

Old MacDonald's Factory Farm C. David Coats, 1989 Breaking the myth of the traditional farm the author brings public attention to the vast cruelties of factory farming where most animals are cared for in hi-tech environments

Moore's Rural New Yorker, 1917 *Is Factory Farming Harming America?* Stuart A. Kallen, 2006-10-01 Books in this anthology series focus a wide range of viewpoints onto a single controversial issue providing in depth discussions by leading advocates Articles are printed in their entirety and footnotes and source notes are retained These books offer the reader not only a full spectrum of dissent on the subject but also the ability to test the validity of arguments by following up on sources used as evidence Extensive bibliographies and annotated lists of relevant organizations to contact offer a gateway to further research This series provides a quick grounding in the issues a challenge to critical thinking skills and an excellent research tool in each inexpensive volume Happier Meals Danielle Nierenberg, Lisa Mastny, 2005 This book documents the harmful effects of factory farming in both industrialized and developing countries and explains the range of problems it can cause From transmission of disease and loss of livestock diversity to hazardous and unsanitary processing methods it shows clearly why factory farming is an unsafe inhumane and ecologically disruptive form of meat production Also shows how the individual can make a difference by supporting local organic or pasture raised animal products Factory Farming Lauri S. Scherer, 2015 Explores the issues surrounding the factory farming meeting the world's demand for food by placing opinions from a wide range of sources in a pro con format Features articles that express various perspectives on this topic The Journal of the Land Agents' Society, 1919 **Organic Gardening and Farming** Jerome Irving Rodale, 1964 *Assault and Battery* Mark Gold, 1983 Aan de hand van verschillende misstanden in de houderij het transport en de slacht van pluimvee varkens en rundvee wordt aangedrongen op verbetering in methoden en op een mentaliteitsverandering **The End of Animal Farming** Jacy Reese, 2018-11-06 A bold yet realistic vision of how technology and social change are creating a food system in which we no longer use animals to produce meat dairy or eggs Michael Pollan's *The Omnivore's Dilemma* and Jonathan Safran Foer's *Eating Animals* brought widespread attention to the disturbing realities of factory farming *The End of Animal Farming* pushes this conversation forward by outlining a strategic roadmap to a humane ethical and efficient food system in which slaughterhouses are obsolete where the tastes of even the most die hard meat eater are satisfied by innovative food technologies like cultured meats and plant based protein Social scientist and animal advocate Jacy Reese analyzes the social forces leading us toward the downfall of animal agriculture the technology making this change possible for the meat hungry public and the activism driving consumer demand for plant based and cultured foods Reese contextualizes the issue of factory farming the inhumane system of industrial farming that 95 percent of farmed animals endure as part of humanity's expanding moral circle Humanity increasingly treats nonhuman animals from household pets to orca whales with respect and kindness and Reese argues that farmed animals are the next step Reese applies an analytical lens of effective altruism the burgeoning philosophy of using evidence based research to maximize one's positive impact in the world in order to better understand which strategies can help expand the moral circle now and in the future *The End of Animal Farming* is not a scolding treatise or a prescription for an ascetic diet Reese invites readers vegan and non vegan to
