Grid Lock:

Breaking Digital Gridlock John Best, 2018-02-09 Strategic technology strategy for smaller financial institutions Breaking Digital Gridlock empowers credit unions and community banks to make the shift to digital even without a seven figure consulting budget From leadership to technology to security and more this book provides effective real world strategies for taking the leap without tearing your organization apart With an emphasis on maintaining the culture services and features you have carefully crafted for your customers over the years these strategies allow you to make your organization more resistant to digital disruption by adopting key technologies at key points in their evolution Expert advice grounded in practicality shows how FinTech partnerships and strategic technology acquisition can foster new growth with minimal disruption and how project management can be restructured to most effectively implement any digital solution and how to implement and leverage analytics Specific implementation advice coupled with expert approaches offer the ability to modernize in an efficient organized financially sound manner The companion website features a digital readiness assessment that helps clarify the breadth and scope of the change and serves as a progress check every step of the way Access to digital assets helps smooth the path to implementation and a reader forum facilitates the exchange of ideas experiences and advice Identify revolutionary versus evolutionary technology opportunities Empower employee innovation and stop managing all risk out of good ideas Understand blockchain machine learning cloud computing and other technologies Forge strategic partnerships that will drive growth and success amidst technological upheaval It is widely accepted that digital is the future of banking but knowing is not the same as doing If your organization has been riding the fence for too long amidst uncertainty and budget constraints *Breaking Digital Gridlock* provides the solutions strategies and knowledge you need to begin moving forward

The Other Side of Gridlock Manabu Saeki, 2010-03-24 Drawing upon a wealth of congressional data from 1953 through 2006 this study offers new insights into the politics of gridlock one of the more contentious issues in Washington D C since the early 1990s Previous analyses have focused on either the volume of enacted law or the ratio of enacted legislation to the entire legislative agenda Manabu Saeki departs substantially from these approaches by looking at the policy content of enacted laws while defining gridlock as an inability to change policy He asks why has there been so much policy stability Saeki looks closely at party control as do previous studies but he also examines the ideological configuration of the bipartisan supermajority

Gridlock Thomas Hale, David Held, Kevin Young, 2013-07-11 The issues that increasingly dominate the 21st century cannot be solved by any single country acting alone no matter how powerful To manage the global economy prevent runaway environmental destruction reign in nuclear proliferation or confront other global challenges we must cooperate But at the same time our tools for global policymaking chiefly state to state negotiations over treaties and international institutions have broken down The result is gridlock which manifests across areas via a number of common mechanisms The rise of new powers representing a more diverse array of interests makes agreement

more difficult The problems themselves have also grown harder as global policy issues penetrate ever more deeply into core domestic concerns Existing institutions created for a different world also lock in pathological decision making procedures and render the field ever more complex All of these processes in part a function of previous successful efforts at cooperation have led global cooperation to fail us even as we need it most Ranging over the main areas of global concern from security to the global economy and the environment this book examines these mechanisms of gridlock and pathways beyond them It is written in a highly accessible way making it relevant not only to students of politics and international relations but also to a wider general readership

Revolving Gridlock David W. Brady, 2018-02-26 Despite the early prospects for bipartisan unity on terrorism initiatives government gridlock continues on most major issues in the wake of the 2004 elections In this fully revised edition political scientists David W Brady and Craig Volden demonstrate that gridlock is not a product of divided government party politics or any of the usual scapegoats It is instead an instrumental part of American government built into our institutions and sustained by leaders acting rationally not only to achieve set goals but to thwart foolish inadvertencies Looking at key legislative issues from the divided government under Reagan through Clinton s Democratic government to complete unified Republican control under George W Bush the authors clearly and carefully analyze important crux points in lawmaking the swing votes the veto the filibuster and the rise of tough budget politics They show that when it comes to government gridlock it doesn t matter who s in the White House or who s in control of Congress it s as American as apple pie and its results may ultimately be as sweet in ensuring stability and democracy

Moving Beyond Gridlock Robert T. Dunphy, 1997 This volume attempts to put the transportation problem in the context of regional land use and to offer guidance to those who make transportation improvements and to planners who approve and implement projects that need transportation services

Breaking the Environmental Policy Gridlock Terry Lee Anderson, 1997 The contributions to this volume demonstrate how the principles of fiscal responsibility and individual accountability that have been applied to economic and social policies essentially free market principles can be applied successfully to environmental policy The authors offer ten commonsense reforms as a starting point all based on the compelling arguments that a new system of positive incentives can get us more environmental quality at lower cost These reforms include land lease programs for nontraditional commodity production long term transferable land permits landowner compensation for regulated endangered species property and performance based as opposed to technology based water and air pollution laws
