Facing Nuclear War:

Facing the Nuclear Heresy G. Clarke Chapman, 1986 **Imagining Nuclear War in the British Army, 1945-1989** Simon Moody, 2020 The primary mission assigned to the British Army from the 1950s until the end of the Cold War was deterring Soviet aggression in Europe by demonstrating the will and capability to fight with nuclear weapons to defend NATO territory This is the first comprehensive account of how the British Army imagined nuclear war and how it planned to fight it **Just War Theory and Non-State Actors** Eric E. Smith, 2020-03-20 This book uses an historical body of knowledge Just War Theory as the basis for analyzing modern conflicts involving Armed Non State Actors who employ force against states As the global community faces the challenges of globalization terrorism 24 hour international news coverage super power collapse weapons of mass destruction and failed states the author explores whether the historic bodies of knowledge governing decision makers during conflict remain relevant Tracing the evolution of Just War Theory he analyzes circumstances involving Armed Non State Actor ANSA groups possessing powerful and destructive capabilities and a desire to use them and pursues answers to the central research question how does Just War Theory apply in modern scenarios involving ANSA groups who challenge the state and international institutions monopoly on use of force The study finds that Just War Theory still has the capacity to accommodate modern day statecraft and application in scenarios involving Armed Non State Actors This book will be of great interest to those researching and studying in the fields of political theory security studies international relations war and conflict studies and public ethics **Bulletin of the Atomic Scientists**, 1986-05 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world **Proceedings of the Annual Student Conference on United States Affairs** Student Conference on United States Affairs. U.S. Military Academy, 1963 **The Oxford Handbook of History and International Relations** Mlada Bukovansky, Edward Keene, Christian Reus-Smit, Maja Spanu, 2023-08-08 Historical approaches to the study of world politics have always been a major part of the academic discipline of International Relations and there has recently been a resurgence of scholarly interest in this area This Oxford Handbook examines the past and present of the intersection between history and IR and looks to the future by laying out new questions and directions for research Seeking to transcend well worn disciplinary debates between historians and IR scholars the Handbook asks authors from both fields to engage with the central themes of modernity and granularity Modernity is one of the basic organising categories of speculation about continuity and discontinuity in the history of world politics but one that is increasingly questioned for privileging one kind of experience and marginalizing others The theme of granularity highlights the importance of how decisions about the scale and scope of historical research in IR shape what can be seen and how one sees it Together these themes provide points of affinity across the wide range of topics and approaches presented here The Handbook is organized into four parts The first

Readings gives a state of the art analysis of numerous aspects of the disciplinary encounter between historians and IR theorists Thereafter sections on Practices Locales and Moments offer a wide variety of perspectives from the longue dur e to the ephemeral individual moment and challenge many conventional ways of defining the contexts of historical enquiry about international relations Contributors come from a range of academic backgrounds and present a diverse array of methodological and philosophical ideas as well as their various historical interests The Oxford Handbooks of International Relations is a twelve volume set of reference books offering authoritative and innovative engagements with the principal sub fields of International Relations The series as a whole is under the General Editorship of Christian Reus Smit of the University of Queensland and Duncan Snidal of the University of Oxford with each volume edited by specialists in the field The series both surveys the broad terrain of International Relations scholarship and reshapes it pushing each sub field in challenging new directions Following the example of Reus Smit and Snidal s original Oxford Handbook of International Relations each volume is organized around a strong central thematic by scholars drawn from different perspectives reading its sub field in an entirely new way and pushing scholarship in challenging new directions

Facing Nuclear War Donald B. Kraybill,1982 Future Survey Annual 1983 Michael Marien,1984-01-01 Psychological Mechanisms and Mental Health in the Face of Current Conflicts and Crises Hubert Annen ,Carl Castro,2025-10-13 In the past two years humanity has been confronted with unprecedented crises most recently the war in Ukraine The flood of related media reports as well as refugee flows the looming energy shortage and individual fear of expansion of the conflict has forced the war into reality and has been made part of our everyday lives Against this backdrop the psychological impact and implications become apparent At the core of such an event it is members of the armed forces and their families who must find ways to deal with the experiences and their consequences In addition it is also essential to consider the affected population who suffer directly from the war are exposed to propaganda and whose morale willpower and resilience influence the direction in which the conflict develops In this context how the individual deals with such events are of paramount importance For example a certain war fatigue among the population of European countries can lead to a decline in idealistic but also material support These psychological aspects also play a role for members of humanitarian organizations or similar groupings that are involved in a supporting capacity or in conflict management who in turn must face specific mental challenges This raises the fundamental question of how psychological knowledge and respective methods can contribute to preventing and ending such conflicts

Psychosocial Aspects of the Threat and Prevention of Nuclear War Edward Markarian,1988 **Facing My Lai** David L. Anderson,1998 But these questions are asked again in the hope that they might lead to a better understanding of what My Lai means for us now **Face the Nation** Columbia Broadcasting System, inc,1972 *U.S.M.A. Student Conference on United States Affairs* ,1963 **Light** ,1984 War Paul Francis Diehl,2005 **Nuclear Arms and the Human Race** Rikhi Jaipal,1986 **Nixon's Vietnam War** Jeffrey P. Kimball,1998 The signing of the Paris Agreement

in 1973 ended not only America's Vietnam War but also Richard Nixon's best laid plans. After years of secret negotiations, threats of massive bombing and secret diplomacy designed to shatter strained Communist alliances, the president had to settle for a peace that fell far short of his original aims. *Face to Face with the Bomb*, 2003. Photographer Shambroom documents the post-Cold War nuclear reality in a series of striking and eerily beautiful images that offer an unprecedented inside look at America's nuclear arsenal. 83 color photos. **Unlikely Environmentalists** Paul Charles Milazzo, 2006. Reveals how boosters, bureaucrats and engineers, not grassroots protesters, were truly the ones responsible for spearheading the passage of the Clean Water Act of 1972. How these unlikely protagonists helped to pass the era's most far-reaching regulatory law gives us rare insight into how Congress was able to take the lead in addressing those concerns, namely in the form of water quality issues. *Bernard Brodie and the Foundations of American Nuclear Strategy* Barry Howard Steiner, 1991. Steiner analyzes how and why Brodie's understanding of weapons of unparalleled explosive force led him to posit the need for revolutionary strategic thinking in broadminded analytic method and in the focus upon cities as nuclear targets. He shows the tremendous effect Brodie's work had on the intellectual climate in which policy is determined, particularly in his frequent combatting of conventional wisdom.
