Injury Research Guohua Li, Susan P. Baker, 2012-01-07 Injury is recognized as a major public health issue worldwide. In most countries, injury is the leading cause of death and disability for children and young adults age 1 to 39 years. Each year in the United States, injury claims about 170,000 lives and results in over 30 million emergency room visits and 2.5 million hospitalizations. Injury is medically defined as organ tissue damages inflicted upon oneself or by an external agent either accidentally or deliberately. Injury encompasses the undesirable consequences of a wide array of events such as motor vehicle crashes, poisoning, burns, falls, and drowning, medical error, adverse effects of drugs, suicide, and homicide. The past two decades have witnessed a remarkable growth in injury research both in scope and in depth. To address the tremendous health burden of injury morbidity and mortality at the global level, the World Health Organization in 2000 created the Department of Injury and Violence Prevention, which has produced several influential reports on violence, traffic injury, and childhood injury. The biennial World Conference on Injury Control and Safety Promotion attracts a large international audience and has been successfully convened nine times in different countries. In the United States, the National Center for Injury Prevention and Control became an independent program of the federal Centers for Disease Prevention and Control in 1997. Since then, each state health department has created an office in charge of injury prevention activities, and over a dozen universities have established injury control research centers. This volume will fill an important gap in the scientific literature by providing a comprehensive and up-to-date reference resource to researchers, practitioners, and students working on different aspects of the injury problem and in different practice settings and academic fields. Beck, Deborah Beck Busis, 2015-05-04 From the New York Times bestselling author of *The Beck Diet Solution*. Most diet programmes work at first. We lose a few pounds in a few weeks, but then life happens and the bad habits and the weight return. In this invaluable book, Judith Beck PhD offers the solution to break free from these common diet traps and keep the weight off for life. Judith Beck explains that when it comes to losing weight, it's not just about what we eat; it's also about how we think. To consistently eat differently, we must learn to think differently. Diets fail us because they don't offer effective strategies for overcoming the common traps: emotional eating, social pressure, dining out that can derail us. Now she and her daughter, Deborah Beck Busis, share the techniques they have successfully used with thousands of clients, revealing exactly how to overcome the thoughts and behaviours that have been holding you back. With *The Diet Trap Solution*, readers on any diet can learn to identify their
