this book foresees transhumanist new eugenics that are accompanying the new empire in a supposedly Anthropocene world that serves to justify the sacrifice and disposability of some surplus humans living in the recesses and nether regions of the empire Paying attention to the colonial comeback the book urges African scholars not to mistake imperial transformation for decolonisation The book is invaluable for scholars and activists in African studies anthropology decoloniality sociology politics development studies security studies sociology and anthropology of science and technology studies and environmental studies **Handbook of Christian Apologetics** Ronald K.
