## Escape From Scepticism:

*Escape from Scepticism* Christopher Derrick,2010-09-07 The brilliant English writer Christopher Derrick presents a disturbing indictment of today's colleges and universities and the troubled condition of liberal education The occasion for his writing this book was a visit to Thomas Aquinas College in California which deeply impressed Derrick with its true liberal and Catholic education This small independent college convinced him of the need for reform in Catholic higher education today and he uses the example of this college as the way this reform should be carried out This book is comparable to Newman's Idea of a University Derrick has wit and a brilliant aphoristic style This book could well serve as a manual for the reform of Catholic higher education today Paul Hallet The National Catholic Register

A Philosopher's Guide to Natural Capitalism Wayne I. Henry,2023-07-07 This book posits that a sustainable future is possible without abandoning Capitalism In its current form as Consumer Capitalism the organization of the global economy is clearly unsustainable But Capitalism is a malleable concept that has assumed a variety of forms since the 17th century and it can be altered as needed In Part I of this book the author sets out an economic model for a sustainable form of Capitalism referred to in the literature as Natural Capitalism In Part II he abandons exposition in favour

of rigorous philosophical analysis and critiques the older but still dominant narrative that underlies Classical Liberalism. The narrative will be reconstructed with great care and analysed to understand why it has been so powerful and enduring and of course why it is no longer appropriate for our current circumstances. In Part III he investigates from a normative perspective Classical Liberalism and globalized Capitalism and the economic system it licenses. Finally in the conclusion the author draws the threads of the discussion together in a way that emphasizes the differences between the two narratives: Classical Liberalism on the one hand and the contemporary version of Progressive Liberalism that nurtures and supports Natural Capitalism on the other. This book will be of interest to a broad range of scholars and curious laypersons interested in a clear and interdisciplinary presentation of the issues arising out of climate change including corporate governance, social and environmental policy, declining social capital and the capacity of democratic institutions to deal effectively with sustainability. It will be particularly relevant for students and instructors of philosophy, history, economics, political science, social policy and environmental sociology. <https://waynehenry.com>
