Political Economy for the 21st Century Charles J. Whalen,Hyman P. Minsky,2015-04-15 This text provides an alternative to conventional economics drawing on the neoclassical and non neoclassical insights of Lester Thurow Robert Heilbroner Alice Amsden Barry Bluestone and 11 other prominent economists from America and England It is intended to provide productive analyses of several contemporary economic problems The Sage Encyclopedia of Education and Gender Elizabeth E. Blair,Sherry L. Deckman,2025-10-06 Gender is a prominent and often contested issue in educational settings across the globe While understandings of gender and academic and professional potential roles and expectations and opportunities and abilities have greatly expanded over the past century in various contexts schools remain sites of intense conflict around definitions of gender and gendered access and expression For example in the US there is growing public backlash against recognizing gender diversity in schools with educators being called to make their teaching more inclusive while schools debate what representations are permissible and parents bring legal action against school districts over recognizing students chosen gender expression Furthermore educational access and outcomes have nuanced gendered patterns to which educators and educational researchers must be attentive For example in India growing literacy rates among youth now show gender parity while across age groups men show higher literacy rates than women In Afghanistan girls have recently been restricted from attending school Globally school attendance among youth who menstruate is reduced because of lack of access to menstrual health products In the US and many Western countries women are more likely to graduate high school and college than men with the US showing the greatest degree attainment disparities between women and men of color However US women still advance in STEM fields at persistently lower rates than men a pattern contrasted by the rapid rise of women earning the majority of STEM degrees in China These examples begin to show the nuance of gendered educational patterns with perspectives growing in complexity as our understandings of gender shift and change moving beyond the traditional gender binary Yet despite rapid changes in gendered educational patterns and in how education scholars conceptualize and study gender the field lacks a recent comprehensive resource text This two volume encyclopedia a unique compendium on gender and education with an expansive and inclusive approach will address this

urgent need Featuring a broad range of 250 300 well researched short articles written by global experts in the field this much needed guide will be an essential first stop resource for students and scholars exploring issues of gender and education as well as educators caught in a rapidly changing and nuanced field A central strength of this encyclopedia will be its broad nuanced and inclusive exploration of gender Entries will explore topics of gender and education comprehensively through an intersectional lens covering issues of gender equity identity and inclusivity in education that impact women girls men boys trans genderqueer and nonbinary people As education is an interdisciplinary field the Encyclopedia will draw from perspectives in sociology anthropology psychology policy studies leadership philosophy history economics law curriculum studies public health race ethnic studies and women gender queer studies

Feminist Ethics Claudia Card,1991 Fifteen essays address subjects ranging from the history of feminist ethics to the logic of pluralist feminism and present feminist perspectives on such topics as terrorism bitterness women trusting other women and survival and ethics Paper edition unseen 14 95 Annotation copyrighted by Book News Inc Portland OR

The Depression Questions Stacey Ridel,2015 As psychological inquiry increasingly utilizes the medium of the scientific the importance of the personal narrative is diminished Disembodied objective research studies are weighted heavier than first person accounts Research is fixated upon fixing but what if depression is not what needs fixing What if depression will always be beyond the reach of knowing as a manifestation of the inherent unknown What would be the implications for how psychology conceptualizes depression For the experience of depression This work is most directly inspired by French psychoanalyst Luce Irigaray 1930 present and her discussions of the feminine What is the feminine I play with this question to show how there is no clear singular answer Therefore I do not intend to argue my points but to embark upon a philosophical journey with my reader My hope is that we will arrive at a different place each time

Handbook of Feminist Research Sharlene Nagy Hesse-Biber,2007 The topic feminist research has too often been neglected in standard research methods books The Handbook of Feminist Research represents the establishment of a new tradition or paradigm in viewing how the research process is implemented Feminist researchers bring unique epistemological and methodological perspectives to the research process Feminists approach to methodology allows for new types of questions about women s lives and those of other ed marginalized groups to be addressed within their respective fields of research This Handbook stresses the interconnections between epistemology methodology and methods They are not de linked from each other but work together in dynamic ways to produce new knowledge and this openness itself is also characteristic of how feminist researchers approach their work Feminists engage synergistically with all three aspects of the research process epistemology methodology and method Through a synergistic connection between these elements of research epistemology methodology and method we find that feminist research often shapes new research endeavors that are greater than the sum of their parts In other words while traditional research employs these components of research the synergistic engagement of

these components in feminist research questions the status quo aiming to raise our consciousness about how we do research Looking at the selections provided in this Handbook we are able to look at feminist research its implementation of synergistic use of epistemology methodology and method and the resulting qualities of feminist research in practice *On Feminist Ethics and Politics* Claudia Card,1999 For years mainstream feminist ethics focused criticism on male supremacy Feminist philosophers in this volume adopt a less male focused stance to look closely at oppression s impact on women s agency and on women s relations with women Examining legal social and physical relationships these philosophers confront moral ambiguity moral compromise and complicity in perpetuating oppression Combining personal experience with philosophical inquiry they vividly portray their daily engagement with oppression as both victims and perpetrators They explore such issues as how pornography silences women and radical feminist politics complicity in racism Among these insightful essays Sandra Bartky argues that women share guilt for racism when they benefit from it without protest Susan Brison reflects on uses of narrative in trauma recovery from such experiences as being targeted for rape or murder Joan Callahan examines fallout of derogatory speech directed at lesbians Virginia Held proposes carrying care into marketplaces and governments and in her introduction Claudia Card draws on Primo Levi s conception of gray zones in exploring dangers of character damage to victims of misogyny A fitting companion to Card s highly regarded *Feminist Ethics* this volume interweaves observations on character political ethics violence and love into an accessible sourcebook for students It tackles some of feminism s most pressing issues and helps readers to identify and then overcome the real damage caused by oppression

identities and interpretations of Black women and girls and other people of color Daughtering as a tool of analysis in Black feminist qualitative inquiry is our own cultural and spiritual way of being doing and performing decolonizing work

Feminist Collections, 2000 Feminist (Re)visions of the Subject Gail Currie, Celia E. Rothenberg, 2001-06-06 Feminist Revisions utilizes the study of space and place which extends through sociology anthropology cultural studies and area studies historical perspectives and philosophy as a paradigm for cross disciplinary inquiry Noting that both the study of space place and feminism are transected by the lines of spacial conceptual and ontological disintegration in contemporary academia Gail Currie and Celia Rothenberg have culled a collection of writings drawn together from feminist scholars across several disciplines to address three questions how are subjects constituted in relation to the spaces and places they occupy how are those spaces and places in turn negotiated and transformed and how are feminists actively constructing new visions of the female subject in the context of the postmodern academic terrain This work sets the stage for the development of a productive feminist praxis in an academic world some fear has been relativized and depoliticized by the postmodern turn

As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
