

Embodying Enlightenment: Physical Culture in Dzogchen as revealed in Tibet's Lukhang Murals

Ian A. Baker

Abstract

The Great Perfection or Dzogchen (*rdzogs chen*) teachings of Tibet are upheld as revealing the ultimate unconditioned nature of human consciousness without recourse to the transformational rites and practices that characterise the tantric, or Vajrayāna, form of Buddhism from which it arose. While Dzogchen is commonly perceived, and presented, as pertaining principally to the reflexive 'self-liberating' potential of the mind, its practice is traditionally infused by physical exercises that push the body—and thereby consciousness—beyond conventional limits and constraints. Dzogchen's body-oriented approach to the realisation of habitually dormant perceptual and existential capacities is vividly portrayed in a series of late seventeenth-century murals in a once secret meditation chamber in Lhasa conceived during the reign of the Fifth Dalai Lama. The wall paintings illustrate a Dzogchen 'treasure text' (*gtar ma*) revealed two centuries earlier by Tertön Ögyen Pema Lingpa (1450–1521) and ascribed to Padmasambhava, the 'Lotus Born' sage credited with having established Dzogchen in Tibet in the eighth century. Embellished with illuminating passages from Pema Lingpa's 'Compendium of Enlightened Spontaneity' (*rdzogs chen kun brang dgyong 'dau*), the Lukhang murals clearly portray the pro-somatic practices (*rna chung 'drol 'khor*) held to facilitate realisation of the mind's inherent 'Buddha Nature' (*de gi bdegs snying pa*, Skt: *nābhūṅgarūpīḥā*). Illustrated with details of the Lukhang murals, this article presents an overview of Dzogchen's core practices in an attempt to demonstrate that while the 'innate perfection' of Dzogchen can, as tradition upholds, be directly cognised without any modification of mind or body, it is more commonly a consequence of intensive *göng* and *batshayegs*-like practices, fused with Dzogchen's signature 'view' of non-duality (*gyüi med*). A key chapter of Pema Lingpa's Dzogchen 'treasure text' is appended to the article, further illuminating the fundamental dynamics of mind and body at the heart of the Dzogchen tradition and the ways in which primordial unitary awareness (*rig pa*) arises vibrantly and unconditionally in response to physiology and perception pushed beyond their accustomed limits, whether in states of waking, sleeping, dreaming, or near-death experiences.

Embodying Enlightenment Rebecca Haidt, 1998-10-14 In eighteenth century Spain just as in Britain and France the term Enlightenment implied both a spirit of criticism and the dissemination of new scientific and philosophical modes of thought But in Spain this new way of thinking also required the incorporation of ancient epistemologies in particular practices and ideas concerning the healing training and experience of the body In *Embodying Enlightenment* Rebecca Haidt investigates this distinctly Spanish fascination with the cultural construction of bodies during the Enlightenment particularly masculine bodies Haidt interlaces a host of disciplines in her analysis of key works of eighteenth century literature and art including medical treatises visual imagery poetry and erotica She then traces the classical knowledge that informed the literature of the gendered medicalized and politicized male body in eighteenth century Spanish culture What results is an original and revealing study of the body in Spanish culture and thought and a new look at the Spanish Enlightenment from a very unique angle

Cosmopolitanism in Mexican Visual Culture María Fernández, 2014-01-06 Since the colonial era Mexican art has emerged from an ongoing process of negotiation between the local and the global which frequently involves invention synthesis and transformation of diverse discursive and artistic traditions In this pathfinding book María Fernández uses the concept of cosmopolitanism to explore this important aspect of Mexican art in which visual culture and power relations unite the local and the global the national and the international the universal and the particular She argues that in Mexico as in other colonized regions colonization constructed power dynamics and forms of violence that persisted in the independent nation

state Accordingly Fernández presents not only the visual qualities of objects but also the discourses ideas desires and practices that are fundamental to the very existence of visual objects Fernández organizes episodes in the history of Mexican art and architecture ranging from the seventeenth century to the end of the twentieth century around the consistent but unacknowledged historical theme of cosmopolitanism allowing readers to discern relationships among various historical periods and works that are new and yet simultaneously dependent on their predecessors She uses case studies of art and architecture produced in response to government commissions to demonstrate that established visual forms and meanings in Mexican art reflect and inform desires expectations memories and ways of being in the world in short that visual culture and cosmopolitanism are fundamental to processes of subjectification and identity Life Embodied Nicolás Fernández-Medina,2018-05-30 The concept of vital force the immanent energy that promotes the processes of life in the body and in nature has proved a source of endless fascination and controversy Indeed the question of what vitalizes the body has haunted humanity since antiquity and became even more pressing during the Scientific Revolution and beyond Examining the complexities and theories about vital force in Spanish modernity Nicolás Fernández Medina's *Life Embodied* offers a novel and provocative assessment of the question of bodily life in Spain Starting with Juan de Cabriada's landmark *Carta filosófica místico-chymica* of 1687 and ending with Ramón Gómez de la Serna's avant-gardism of the 1910s Fernández Medina incorporates discussions of anatomy philosophy science critical theory history of medicine and literary studies to argue that concepts of vital force served as powerful vehicles to interrogate the possibilities and limits of corporeality Paying close attention to how the body's capabilities were conceived and strategically woven into critiques of modernity Fernández Medina engages the work of Miguel Boix y Moliner Martín Martínez Diego de Torres Villarroel Sebastián Guerrero Herreros Ignacio Marañón Ruiz de Luzuriaga Gaspar Melchor de Jovellanos Pedro Mata y Fontanet Ángela Grassi Julián Sanz del Río Miguel de Unamuno and Pío Baroja among others Drawing on extensive research and analysis *Life Embodied* breaks new ground as the first book to address the question of vital force in Spanish modernity *The Invention of the Colonial Americas* Byron Ellsworth Hamann,2022-09-13 The story of Seville's Archive of the Indies reveals how current views of the sixteenth and seventeenth centuries are based on radical historical revisionism in Spain in the late 1700s *The Invention of the Colonial Americas* is an architectural history and media archaeological study of changing theories and practices of government archives in Enlightenment Spain It centers on an archive created in Seville for storing Spain's pre-1760 documents about the New World To fill this new archive older archives elsewhere in Spain spaces in which records about American history were stored together with records about European history were dismembered The Archive of the Indies thus constructed a scholarly apparatus that made it easier to imagine the history of the Americas as independent from the history of Europe and vice versa In this meticulously researched book Byron Ellsworth Hamann explores how building layouts systems of storage and the arrangement of documents were designed to foster the creation of new knowledge He draws on a rich collection of

eighteenth century architectural plans descriptions models document catalogs and surviving buildings to present a literal materially precise account of archives as assemblages of spaces humans and data assemblages that were understood circa 1800 as capable of actively generating scholarly innovation [Framing Majismo](#) Tara Zanardi, 2016-03-08 Majismo a cultural phenomenon that embodied the popular aesthetic in Spain from the second half of the eighteenth century served as a vehicle to regain Spanish heritage As expressed in visual representations of popular types participating in traditional customs and wearing garments viewed as historically Spanish majismo conferred on Spanish citizens the pictorial ideal of a shared national character In [Framing Majismo](#) Tara Zanardi explores nobles fascination with and appropriation of the practices and types associated with majismo as well as how this connection cultivated the formation of an elite Spanish identity in the late 1700s and aided the Bourbons objective to fashion themselves as the legitimate rulers of Spain In particular the book considers artistic and literary representations of the majo and the maja purportedly native types who embodied and performed uniquely Spanish characteristics Such visual examples of majismo emerge as critical and contentious sites for navigating eighteenth century conceptions of gender national character and noble identity Zanardi also examines how these bodies were contrasted with those regarded as foreign finding that foreign and national bodies were frequently described and depicted in similar ways She isolates and uncovers the nuances of bodily representation ultimately showing how the body and the emergent nation were mutually constructed at a critical historical moment for both
