M. Blayney, 2013-11-21 This major revisionist reference work explains for the first time how the Stationers Company acquired both a charter and a nationwide monopoly of printing In the most detailed and comprehensive investigation of the London book trade in any period Peter Blayney systematically documents the story from 1501 when printing first established permanent roots inside the City boundaries until the Stationers Company was incorporated by royal charter in 1557 Having exhaustively re examined original sources and scoured numerous archives unexplored by others in the field Blayney radically revises accepted beliefs about such matters as the scale of native production versus importation privileges and patents and the regulation of printing by the Church Crown and City His persistent focus on individuals most notably the families rivals and successors of Richard Pynson John Rastell and Robert Redman keeps this study firmly grounded in the vivid lives and careers of early Tudor Londoners Dutch Typography in the Sixteenth Century Paul Valkema Blouw, 2013-06-03 When compiling the short title catalogue of books printed in the sixteenth century northern Netherlands from 1541 to 1600 Paul Valkema Blouw was confronted with a large number of problem cases such as anonymously and or surreptitiously printed editions fictitious printers and undated or falsely dated printed works By minutely analysing the typefaces initials vignettes and other ornaments used drawing from his extensive knowledge of secondary literature archival information and his unrivalled typographic memory he not only managed to attribute a surprising number of these publications to a printer but also could establish the period of time in which as well as the places where they must have been printed These findings and the ways in which they were reached are described in the present collection of papers They are of paramount importance to scholars engaged in research of the period concerned whether in the field of church history national history or book history *The Palaeotypography of the French Renaissance* Hendrik D. L. Vervliet, 2008 This collection of thirteen essays examines sixteenth century type design in France Typefaces developed during this period were to influence decisively the typography of the centuries which followed and they continue to influence a great many contemporary typefaces The papers common goal is to establish the paternity of the typefaces described and critically to appraise their attributions many of which have previously been inadequately ascribed Such an

approach will be of interest to type historians and type designers seeking better documented attributions and to historians philologists and bibliographers whose study of historical imprints will benefit from more accurate type descriptions The papers and illustrations focus on the most important letter cutters of the French Renaissance including Simon de Colines Robert Estienne Claude Garamont Robert Granjon Pierre Haultin and also include a number of minor masters of the period
