Intercultural Communication and International Students Anastassia Zabrodskaia , Jiayi Wang, 2025-12-17 With internationalization high on the agenda of education providers worldwide the complex relationship between intercultural communication and the international student phenomenon deserves close study Being an international student is a great opportunity to be exposed to a new language and culture and to develop intercultural communication skills Traditionally the phrase international students refers to those who undertake all or part of their education in a country other than their own For present purposes though we adopt a broad definition of the phrase to include transnational education TNE students who are often regarded as international students by their awarding institutions The number of international students pursuing tertiary education reached 6.3 million in 2020 up from 2 million in 2000 and this number continues to grow UNESCO Institute of Statistics 2023 The recent decade has also seen a tremendous expansion of TNE especially during the COVID-19 pandemic both in terms of size and scale TNE is the delivery of education in a country other than the one in which the degree granting institution is based TNE takes many diverse forms including dual degrees joint institutes and international branch campuses to name but a few In many cases

students can get a foreign degree without ever leaving their home country or region Research on international students is often scattered across different disciplines including communication education psychology and language and linguistics The field of intercultural communication a term often used interchangeably with cross cultural communication investigates how people from different cultural backgrounds communicate The combination of intercultural communication and international students is a broad and fascinating topic of research Extant research on the topic has mainly focused on the following areas international students perceptions of intercultural communication the difficulties faced by international students and the correlations between different variables e g intercultural communication competence and effectiveness intergroup anxiety intercultural sensitivity attitude towards other cultures meta stereotypes sensation seeking ethnocentrism empathy mindfulness and motivation to engage in intercultural communication These studies have offered valuable insights into the predictors of intercultural communication competence and effectiveness and the pathways for developing this competence and effectiveness However intercultural communication and international students is a complex topic that requires a multifaceted approach that transcends disciplinary boundaries Research on the topic is lagging behind the growth of student numbers and there are many gaps and underexplored areas For example TNE students have rarely been studied from an intercultural communication perspective and international students perceptions of intercultural communication are much less explored than those of faculty and home students Additionally while academic advising has been found to be vital to international student success academic advisers have reported a lack of institutional training on how to deal with international students The actual intercultural interactions of and with international students have rarely been studied in detail Against this background this Research Topic seeks to create interdisciplinary dialogue and cooperation exploring the gaps and underexamined areas of intercultural communication and international students Themes to be addressed include but are not limited to the following language and communication intercultural communication competence and effectiveness intercultural interaction international student experience transnational education TNE internationalization

Huang Ji at Beijing Normal University was an educational philosopher who interpreted Chinese classical texts as well as arts such as calligraphy and painting in ways that brought new life to Chinese pedagogy. Lu Jie at Nanjing Normal University and Wang Fengxian at Northeast Normal University were leaders in developing a whole new approach to moral education that highlighted subjectivity and self-awakening as China became a socialist market economy. **Cultural Psychology** Prof. Dr. Bilal Semih Bozdemir, The influence of culture on decision making and problem solving is profound and pervasive. Sistare,Larry May,Leslie Francis,2001 In matters such as affirmative action or home schooling rights of ethnic and other minority groups often come into conflict with those of society in a culturally diverse population such as ours But before considering the dilemmas posed by these issues we must first ask such basic but important questions as what group rights are and how they intersect with the principles of democracy This new collection brings together some of today s leading thinkers from the cutting edge of these debates taking in a broad range of issues confronting philosophers sociologists and political scientists Contributors such as Carl Wellman Carol Gould and Rex Martin examine the nature of groups and the conflict between group rights and democracy and also consider case studies depicting current issues in cultural ethnic and religious rights The first section on the nature of groups examines some of the perplexing alternatives in the formulation of a theory of group rights These articles investigate the kinds of rights minorities might claim and ask when groups can be held responsible for the acts of some of their members The second section addresses the treatment of groups in a democracy and the precarious balance between indifference toward minorities and capitulation to their demands Here the contributors examine five principles for the sensitive treatment of minority and disadvantaged groups in a democratic society A final section explores specific conflicts between subgroup and societal claims through case studies dealing with affirmative action religious practice and the education of children and the land rights of indigenous peoples By drawing on the legal and political dilemmas related to these cases the authors confront issues of core versus peripheral interests of individual member versus subgroup rights and of the possibilities for social openness raised in the preceding sections Written from varied perspectives *Groups and Group Rights* offers stimulating reading for both students and professionals as it takes on some of the most pressing dilemmas confronting our society *Culturally Responsive Cognitive-behavioral Therapy* Pamela A.
