Health And Healing With Bee Products:

Health and Healing with Bee Products C. Leigh Broadhurst, 2007 This book presents all the currently known health benefits of bee products the ultimate nutraceuticals Bee pollen helps to alleviate allergies fatigue high cholesterol infertility impotence prostatitis and varicose veins and aids recovery from illness surgery and cancer Propolis is used as an antiseptic antimicrobial and detoxifier Honey can help heal 30 different types of wounds and chronic skin infections Apitherapy Kemal Çelik, H. Fatih Aşgun, 2020-05-31 Apitherapy or Bee therapy from the Latin apis which means bee is the medicinal use of products made by honeybees Products of the Honeybee include honey pollen beeswax propolis royal jelly and bee venom Some of the conditions treated are multiple sclerosis arthritis wounds pain gout shingles burns tendonitis and infections Great philosophers and physicians such as Aristotle and Hippocrates were fascinated by the industrious bees They captured them in hives studying their complex communities and harvesting the honey for their own consumption One long standing use of honey recorded from as early as 2500 BC and still used today is in the treatment of wounds and burns to the skin The ancient Egyptians used honey in very many different medicines but one particular document gives instruction for placing honey directly onto the affected part of the body and wrapping it round with cloth as a dressing This was used for open wounds cut burns or ulcers and this would help the wound to dry out and heal satisfactorily as the honey would form a barrier to prevent further infection The wound would also heal with the minimum of scarring A number of properties inherent to honey might contribute to its ability to fight infection and promote healing Its high sugar content allows it to draw infection and fluid from wounds by a process called osmosis Honey prevents bacterial growth through its acidic pH and through the work of an enzyme that produces small amounts of hydrogen peroxide Its ability to keep the area around a wound moist and protected promotes fast healing and prevents scarring Honey also contains components from the specific plants used by the bees in their production and it is speculated that some of these components might further add to the antibacterial and wound healing effects of honey The process of pasteurization used to sterilize commercial honeys destroys the enzyme involved in the production of hydrogen peroxide rendering these honeys less antibacterial and deficient of any medicinal benefit **Bee Products for Better Health** C. Leight Broadhurst , 2013-07-15 Here is the latest buzz on some of Mother Nature s most perfect remedies Bee products are nutritional and medicinal powerhouses having antiseptic antimicrobial and immune boosting properties They are used as effective natural remedies for hundreds of conditions from arteriosclerosis to hair loss You ll learn all about these amazing gifts from the apiary in this fully revised guide to purchasing storing and using bee pollen propolis honey and royal jelly In addition to providing the latest medical research on the health benefits of bee products this updated edition provides a wealth of suggestions and recipes for using bee products for health and healing The excellent tips on using bee products to prevent common infections are essential for every household especially now that many bacteria are showing increased resistance to antibiotics *Bee Products - Chemical and Biological Properties* José M.
