**Coming to Grips with Loss** Kate Cummings, 2015-11-02 Coming to Grips with Loss is a theory that depicts how people heal from any type of significant loss The strength of this theory is that it is grounded in data gathered from people who experienced a myriad of losses of loved ones physical and mental abilities homes careers material goods as well as safety security and other aspects that people hold dear The theory is written in a very deliberate manner that is non pathologizing relevant to a wide array of audiences and is transferable to various fields of study It explains what people say they go through on their way from the initial discovery assessing the possible impact experiencing related feelings and choosing coping actions that can either move one closer or

farther away from healing It offers a road map to recovery for those in helping relationships business managers community leaders and people involved in self care Most importantly it offers a perspective that normalizes the grief process and offers hope that healing is possible

What makes *The Healing Journey of Grief: A Roadmap to Hope* especially valuable to its readers is its focus on hope. We all have or will encounter extreme loss in our lives, feeling unsure how we move forward. Lawrence Biscontini, MA Award-winning author, spa consultant, and wellness speaker. Anyone who has experienced LOSS in life, be it a child, a spouse, anyone, or perhaps suffers from the dread of expectations unmet, it wasn't supposed to be this way, will benefit from reading this book. Written with compassion and empathy, perhaps you will finally find a writer who mirrors much of what you feel and validates all of it. Grief is not just tears after an event; it has a PURPOSE and is integral in the healing process. Grief and loss is the other side of love and attachment, but they all are part of the same coin, the unified whole of who we are. Grief doesn't have a timetable and it certainly can't be defined by other's expectations of us. We grieve when we grieve and we mend when we mend, on our timetable and on our terms. Written from the heart of a mom who lost her beloved only son, she will guide those who are new to the journey AND the rest of us who sometimes struggle finding the words of what to say or even what NOT to say, and will help or things to do that are actually meaningful for someone else going through grief. **Surviving Grief ... and Learning to Live Again** Catherine M. Sanders,2015-08-13 An insightful compassionate account of the grieving process that helps us through the pain and isolation experienced with the loss of a loved one We re never really prepared for the loss of someone we love Thrown into a state of emotional chaos we experience rage guilt anxiety and intense sadness all at once It s the oldest story in the world we tell ourselves millionsof people have had to cope with this before and yet we always believe that what we are experiencing is unique to us We feel isolated in our anguish and often ashamed of what we are feeling A profoundly compassionate and

insightful book *Surviving Grief Learning to Live Again* offers you the support and understanding you need to get you through this difficult time. Written by Dr Catherine Sanders a therapist and researcher specializing in bereavement issues and one who has lived through the loss of close family members it helps you to see that what you are feeling is part of a natural process of readjustment and renewal. According to Dr Sanders grieving like any other natural regenerative process must be allowed to run its proper course if we are ever to regain our equilibrium and continue on with our lives. To help us better understand the process she describes the five universal phases of grief: Shock, Awareness of Loss, Conservation and The Need to Withdraw, Healing and Renewal and guides us through each. Drawing directly from her own experiences and those of her clients and her research studies she delves deeply and compassionately into the different experiences of grief and talks about what it means to lose a mate, a parent or a child. And she discusses the factors that can have an influence on the grieving process such as age, gender and the circumstances surrounding the loved one's death.

*Bereavement and Support* Marylou Hughes, 2013-11-12

In the early 1970s bereavement support groups were almost unknown. However the obvious benefits of the group process for recovery, the mutual support and understanding that helps mourners to a better outlook has created a demand for people who can organise and facilitate these groups. Addressing the basis and need for support groups for the bereaved this book presents a theoretical overview, examines benefits and variety of support groups, structured and unstructured, special populations and specifics for initiating, organising and running them such as publicity. It differs from other treatments in that theory and practice are moulded into a how to approach with all procedures presented equally for the widest range of choices. Also included is a comprehensive book bibliography for adults, children, children's helpers and parents. This text is intended to be of use as a resource for professionals in the field of thanatology including psychologists, psychiatrists, gerontologists, therapists, group counsellors, hospice workers, educators, funeral home directors, home health employees, hospital staff and volunteer organisations that work with survivors.
