**Language Typology and Syntactic Description: Volume 2, Complex Constructions** Timothy Shopen, 2007-10-04 This unique three volume 2007 survey brings together a team of leading scholars to explore the syntactic and morphological structures of the world's languages Clearly organized and broad ranging it covers topics such as parts of speech passives complementation relative clauses adverbial clauses inflectional morphology tense aspect mood and deixis The contributors look at the major ways that these notions are realized and provide informative sketches of them at work in a range of languages Each volume is accessibly written and clearly explains each new concept introduced Although the volumes can be read independently together they provide an indispensable reference work for all linguists and fieldworkers interested in cross linguistic generalizations Most of the chapters in the second edition are substantially revised or completely new some on topics not covered by the first edition Volume II covers co ordination complementation noun phrase structure relative clauses adverbial clauses discourse structure and sentences as combinations of clauses

**Frequency and the Emergence of Linguistic Structure** Joan L. Bybee, Paul Hopper, 2001-01-01 A mainstay of functional linguistics has been the claim that linguistic elements and patterns that are frequently used in discourse become conventionalized as grammar This book addresses the two issues that are basic to this claim first the question of what types of elements are frequently used in discourse and second the question of how frequency of use affects cognitive representations Reporting on evidence from natural conversation diachronic change variability child language acquisition and psycholinguistic experimentation the original articles in this book support two major principles First the content of people's interactions consists of a preponderance of subjective evaluative statements dominated by the use of pronouns copulas and intransitive clauses Second the frequency with which certain items and strings of items are used has a profound influence on the way language is broken up into chunks in memory storage the way such chunks are related to other stored material and the ease with which they are accessed to produce new utterances

**The Oxford Handbook of Derivational Morphology** Rochelle Lieber, Pavol Stekauer, 2014-09-25 The Oxford Handbook of Derivational Morphology is intended as a companion volume to The Oxford Handbook of Compounding OUP 2009 Written by distinguished scholars its 41 chapters aim to provide a comprehensive and thorough overview of the study of derivational morphology The handbook begins with an overview and a consideration of definitional matters distinguishing derivation from inflection on the one hand and compounding on the other From a formal perspective the handbook treats affixation prefixation suffixation infixation circumfixation etc conversion reduplication root and pattern and other templatic processes as well as prosodic and subtractive means of forming new words From a semantic

perspective it looks at the processes that form various types of adjectives adverbs nouns and verbs as well as evaluatives and the rarer processes that form function words The book also surveys derivation in fifteen language families that are widely dispersed in terms of both geographical location and typological characteristics

**Emotion in Discourse** J. Lachlan Mackenzie, Laura Alba-Juez, 2019-03-15 Interest in human emotion no longer equates to unscientific speculation 21st century humanities scholars are paying serious attention to our capacity to express emotions and giving rigorous explanations of affect in language We are unquestionably witnessing an emotional turn not only in linguistics but also in other fields of scientific research Emotion in Discourse follows from and reflects on this scholarly awakening to the world of emotion and in particular to its intricate relationship with human language The book presents both the state of the art and the latest research in an effort to unravel the various workings of the expression of emotion in discourse It takes an interdisciplinary approach for emotion is a multifarious phenomenon whose functions in language are enlightened by such other disciplines as psychology neurology or communication studies The volume shows not only how emotion manifests at different linguistic levels but also how it relates to aspects like linguistic appraisal emotional intelligence or humor as well as covering its occurrence in various genres including scientific discourse As such the book contributes to an emerging interdisciplinary field which could be labeled emotionology transcending previous linguistic work and providing an updated characterization of how emotion functions in human discourse

**Syntactic Gradience** Bas Aarts, 2007-06-21 This is the first exhaustive investigation of gradience in syntax conceived of as grammatical indeterminacy It looks at gradience in English word classes phrases clauses and constructions and examines how it may be defined and differentiated Bas Aarts draws on and reviews work in psychology philosophy and language from Aristotle to Chomsky and writes clearly on a fascinating and important aspect of language and cognition

**The Conceptual Structure(s) of Modality** Günther Lampert, Martina Lampert, 2000 This study takes George Lakoff's dictum seriously that arguments about conclusions will be pointless unless there is agreement on the premises Subscribing to the view that linguistic categorization is necessarily theory driven it reconstructs and assesses on the basis of domain independent parameters derived from General Systems Theory and Leonard Talmy's Overlapping Systems Model of Cognitive Organization hegemonic western conceptualizations of modality Arguing against such propositional models of modality the book outlines modifies and extends conceptualizations from a Cognitive Linguistics point of view grounding modality especially on Talmy's Imaging System of Force Dynamics The authors conceive of modality as an experientially and perceptually motivated radial category of Image Schemata ultimately challenging the categorial status of modality as a cognitively motivated category
