Functional Physiology:

A Philosophy of Chiropractic Phillip Ebrall PhD, 2024-11-29 Chiropractic Philosophy is a Chiropractor's self-belief. The Philosophy of Chiropractic is a scientific examination of the discipline. This book is a report of my examination of Chiropractic. It will mean little to those reliant on self-belief. Dantzler, 1996-11 This handbook provides the only complete survey of comparative physiology for both vertebrates and invertebrates at an advanced level appropriate for research scientists, graduate students, postdoctoral fellows, and faculty. It starts with a chapter on the adaptation and evolution of physiological characters, followed by up-to-date chapters covering each organ system in detail. The editors then discuss the comparative physiological strategies organisms have developed for dealing with environmental challenges such as extreme temperatures, extreme dryness, seasonal and diurnal cycles, and variations in salinity and osmolality of aqueous environments. *Research Grants Index* National Institutes of Health (U.S.).
