Fugitives Mission:

The Guaraní and Their Missions Julia J. S. Sarreal, 2014-06-11 The thirty Guaran missions of the R o de la Plata were the largest and most prosperous of all the Catholic missions established throughout the frontier regions of the Americas to convert acculturate and incorporate indigenous peoples and their lands into the Spanish and Portuguese empires But between 1768 and 1800 the mission population fell by almost half and the economy became insolvent This unique socioeconomic history provides a coherent and comprehensive explanation for the missions operation and decline providing readers with an understanding of the material changes experienced by the Guaran in their day to day lives Although the mission economy funded operations sustained the population and influenced daily routines scholars have not focused on this important aspect of Guaran history primarily producing studies of religious and cultural change This book employs mission account books letters and other archival materials to trace the Guaran mission work regime and to examine how the Guaran shaped the mission economy These materials enable the author to poke holes in longheld beliefs about Jesuit mission management and offer original arguments regarding the Bourbon reforms that ultimately made the missions unsustainable

A Population History of the Missions of the Jesuit Province of Paraquaria Robert H. Jackson, 2019-05-08 Scholars have debated the demographic consequences for the indigenous populations of the Americas of 1492 the beginning of sustained contact between the Old and New Worlds Some have hypothesized an initial die off of indigenous population resulting from the introduction of highly contagious crowd diseases such as smallpox and measles So called virgin soil epidemics caused catastrophic mortality that culled the indigenous populations and some scholars such as the late Henry Dobyns hypothesized a rate of decline of around 90 percent as epidemics spread across the Americas like a miasmatic cloud However over the course of generations the indigenous populations developed immunities to the maladies and recovered This book presents a detailed case study of indigenous populations congregated on Jesuit missions in lowland South America that challenges the basic assumptions of the model of virgin soil epidemics It shows that epidemic mortality varied between communities and that catastrophic mortality occurred on some mission communities generations after first sustained contact It concludes that patterns of demographic change among indigenous populations were far more complex than is often assumed This study is of interest to specialists in historical demography colonial Spanish America Native American history and the history of Spanish frontier missions

We Are Not Animals Martin Rizzo-Martinez, 2022-02 Winner of the 2023 John C Ewers Award from the Western History Association 2023 Choice Outstanding Academic Title By examining historical records and drawing on oral histories and the work of anthropologists archaeologists ecologists and psychologists We Are Not Animals sets out to answer questions regarding who the Indigenous people in the Santa Cruz region were and how they survived through the nineteenth century Between 1770 and 1900 the linguistically and culturally diverse Ohlone and Yokuts tribes adapted to and expressed themselves politically and culturally through three distinct colonial encounters with Spain

Mexico and the United States In *We Are Not Animals* Martin Rizzo Martinez traces tribal familial and kinship networks through the missions chancery registry records to reveal stories of individuals and families and shows how ethnic and tribal differences and politics shaped strategies of survival within the diverse population that came to live at Mission Santa Cruz

We Are Not Animals illuminates the stories of Indigenous individuals and families to reveal how Indigenous politics informed each of their choices within a context of immense loss and violent disruption

The Timucuan Chiefdoms of Spanish Florida John E. Worth, 2020-11-10 This first volume of John Worth's substantial two volume work studies the assimilation and eventual destruction of the indigenous Timucuan societies of interior Spanish Florida near St Augustine shedding new light on the nature and function of La Florida's entire mission system Beginning in this volume with analysis of the late prehistoric chiefdoms Worth traces the effects of European exploration and colonization in the late 1500s and describes the expansion of the mission frontier before 1630 As a framework for understanding the Timucuan rebellion of 1654 and its pacification he explores the internal political and economic structure of the colonial system In volume 2 he shows that after the geographic and political restructuring of the Timucua mission province the interior of Florida became a populated chain of way stations along the royal road between St Augustine and the Apalachee province Finally he describes rampant demographic collapse in the missions followed by English sponsored raids setting a stage for their final years in Florida during the mid 1700s The culmination of nearly a decade of original research these books incorporate many previously unknown or little used Spanish documentary sources As an analysis of both the Timucuan chiefdoms and their integration into the colonial system they offer important discussion of the colonial experience for indigenous groups across the nation and the rest of the Americas A volume in the Florida Museum of Natural History Ripley P Bullen Series

Children of Coyote, Missionaries of Saint Francis Steven W. Hackel, 2017-01-15 Recovering lost voices and exploring issues intimate and institutional this sweeping examination of Spanish California illuminates Indian struggles against a confining colonial order and amidst harrowing depopulation To capture the enormous challenges Indians confronted Steven W Hackel integrates textual and quantitative sources and weaves together analyses of disease and depopulation marriage and sexuality crime and punishment and religious economic and political change As colonization reduced their numbers and remade California Indians congregated in missions where they forged communities under Franciscan oversight Yet missions proved disastrously unhealthful and coercive as Franciscans sought control over Indians beliefs and instituted unfamiliar systems of labor and punishment Even so remnants of Indian groups still survived when Mexican officials ended Franciscan rule in the 1830s Many regained land and found strength in ancestral cultures that predated the Spaniards arrival At this study's heart are the dynamic interactions in and around Mission San Carlos Borromeo between Monterey region Indians the Children of Coyote and Spanish missionaries soldiers and settlers Hackel places these local developments in the context of the California mission

system and draws comparisons between California and other areas of the Spanish Borderlands and colonial America Concentrating on the experiences of the Costanoan and Esselen peoples during the colonial period *Children of Coyote* concludes with an epilogue that carries the story of their survival to the present day *Frontiers of Evangelization* Robert H. Jackson, 2017-07-21 The Spanish crown wanted native peoples in its American territories to be evangelized and to that end facilitated the establishment of missions by various Catholic orders Focusing on the Franciscan missions of the Sierra Gorda in Northern New Spain Mexico and the Jesuit missions of Chiquitos in what is now Bolivia *Frontiers of Evangelization* takes a comparative approach to understanding the experiences of indigenous populations in missions on the frontiers of Spanish America Marshaling a wealth of data from sacramental military and census records Robert H Jackson explores the many factors that influenced the stability of mission settlements including the indigenous communities previous subsistence patterns and family structures the evangelical techniques of the missionary orders the social and political organization within the mission communities and epidemiology in relation to population density and mobility The two orders Jackson s research shows organized and administered their missions very differently The Franciscans took a heavy handed approach and implemented disruptive social policies while the Jesuits engaged in a comparatively kinder and gentler form of colonization Yet the most critical factor to the missions success Jackson finds was the indigenous peoples existing demographic profile in particular their mobility Nonsedentary populations like the Pames and Jonaces of the Sierra Gorda were more prone to demographic collapse once brought into the mission system whereas sedentary groups like the Guaran of Chiquitos experienced robust growth and greater resistance to disease and natural disaster Drawing on more than three decades of scholarly work this analysis of crucial archival material augments our understanding of the role of missions in colonization and the fate of indigenous peoples in Spanish America *The Missions and Missionaries of California* Zephyrin Engelhardt, 1908 Comprehensive history of the Jesuit Franciscan and Dominican missionaries in Lower California and of the Franciscans in Upper California **The Sunday Magazine** ,1879 *Unwelcome Guests* Jason H.
