Environment Planning And Social Development:

Environmental Planning and Sustainable Development Vara Saritha, Manoj Kumar Karnena, 2021-05-02

Constructing an environmentally stable future requires a vision that should be sustainable and sound. It has recently become apparent that ecological problems comprise more than just science and economics, needing an innovative model to supplement traditional decision making. The textbook on environmental planning and sustainable development caters to decision making and will help students, researchers, and academicians. The book disseminates knowledge on aspects like understanding humankind as part of the natural system, appreciating diverse influences of anthropogenic activities on the biological system, human responsibility and management of natural resources, and understanding sustainability principles towards sustainable development.

Environmental Planning in the Caribbean Jonathan Pugh, Janet Henshall Momsen, 2006-01-01. Illustrated by case studies from both smaller nations such as Carriacou, Barbados, and St. Lucia, and larger countries including Cuba, Mexico, and Jamaica, this volume brings together leading writers concerned with environmental planning in the Caribbean to provide an interdisciplinary, contemporary critical overview. They argue that context is central to the practice of environmental planning in this region. Rather than focusing on a deterministic colonial geography and history, this volume proposes that whilst a wide range of foreign planning influences can be felt in different contexts, environmental planning emerges in specific settings through the fluid interaction between local and global relations of power. Thus, a number of chapters explore the effects of external discourses upon the region, while others examine discourses on the US style democracy and on tourism.

Handbook for Environmental Planning James McEvoy, Thomas Dietz, 1977

Intermediary Cities and Climate Change: An Opportunity for Sustainable Development OECD, United Nations Human Settlements Programme, 2022-11-16. The consequences of climate change in developing countries are worsening fast; many ecosystems will shortly reach points of irreversible damage, and socio-economic costs will continue to rise. To alleviate the future impacts on populations and economies, policy makers are looking for the spaces where they can make the greatest difference. This report argues that intermediary cities in developing countries are such spaces.

Modernizing China, 2021-12-06. This volume of ten essays on Modernizing China discusses crucial issues on China's economic policies, State-Church relationship, environmental problems, the Four Modernizations, the role of new economic zones, China's perception of external threats, the role of intellectuals, the status of art policy, and the rights of women in society. These essays examine changes taking place in modern China: Will these changes lead to a pluralistic, less oppressive, open society, or will they strengthen the hardliners in consolidating their power? What about the future of China after Deng? The volume attempts to generate intellectual debate on these issues. Contributors are Cheryl L. Brown, Paul Chao, Chu Yuan, Cheng Narayan, Narayan Das, Steven Haverkamp, Ouyang Kang, Arthur Mu, Sen Kao, James T. Myers, Dhirendra K. Vajpeyi, Ranbir Vohra, and Taifa Yu.

perspectives They analyze the results of these practices and suggest alternative methods for guiding directing and controlling the ways in which we modify the landscape They make the case that we as humans have the capacity for community with all life and can ultimately embrace the notion that individual well being is wrapped up in the well being of the whole and that social change can occur before major disasters require it This is the first book to incorporate land use planning with sustainability The authors offer a perspective that opens a range of possibilities for changing current methods They tackle the difficult dilemma of creating consensus among people tapping the powers of mind intuition and experience in developing a sustainable community Using sustainability as a framework Silberstein and Maser present the underlying concepts of sustainable land use planning With Land Use Planning for Sustainable Development you will discover an array of ideas for modifying conventional planning for and regulation of the development of land
