Experiencing Science:

Aesthetic Experience in Science Education Per-Olof Wickman, 2006-04-21 This book examines the role of aesthetic experience in learning science and in science education from the perspective of knowledge as action and language use The theoretical underpinnings are based on the writings of John Dewey and Ludwig Wittgenstein In their spirit aesthetics is examined as it appears in the lives of people and how it relates to the activities in which they are involved Centered around an empirical analysis of how students and their teachers use aesthetic language and acts during laboratory and field work the book demonstrates that aesthetics is something that is constantly talked about in science class and that these aesthetic experiences are intimately involved in learning science These empirical findings are related to current debates about the relation between aesthetics and science and about motivation participation learning and socio cultural issues in science education This book features an empirical demonstration of the importance and specific roles of aesthetic experiences in learning science a novel contribution to the current debate on how to understand motivation participation and learning and a new methodology of studying learning in action Part I sketches out the theoretical concepts of Wickman s practical epistemology analysis of the fundamental role of aesthetics in science and science education Part II develops these concepts through an analysis of the use of aesthetic judgments when students and teachers are talking in university science classes Part III sums up the general implications of the theoretical underpinnings and empirical findings for teaching and learning science Here Wickman expands the findings of his study beyond the university setting to K 8 school science and explicates what it would mean to make science education more aesthetically meaningful Wickman s conclusions deal to a large extent with aesthetic experience as individual transformation and with people s prospects for participation in an activity such as science education These conclusions have significance beyond science teaching and learning that should be of concern to educators generally This book is intended for educational researchers graduate students and teacher educators in science education internationally as well as those interested in aesthetics philosophy of education discourse analysis socio cultural issues motivation learning and meaning making more generally

[Valuing Assessment in Science Education: Pedagogy, Curriculum, Policy](#) Deborah Corrigan, Richard Gunstone, Alister Jones, 2013-06-05 Assessment is a fundamental issue in research in science education in curriculum development and implementation in science education as well as in science teaching and learning This book takes a broad and deep view of research involving assessment in science education across contexts and cultures from whole countries to individual classrooms and across forms and purposes from assessment in the service of student learning to policy implications of system wide assessment It examines the relationships between assessment measurement and evaluation explores assessment philosophies and practices in relation to curriculum and scientific literacy learning and details the relationships between assessment and science education policy The third in a series *Valuing Assessment in Science Education* has chapters from a range of international scholars from across the globe

and staff from Monash University King s College London and University of Waikato The two previous books in the series examined research relevant to the re emergence of values in science education and teaching across the spectrum of science education as well as across cultural contexts through the professional knowledge of science teaching This third book now moves to examine different aspects of generating understanding about what science is learnt how it is learnt and how it is valued Valuing Assessment in Science Education will appeal to all those with some engagement with and or use of research in science education including research students academics curriculum development agencies assessment authorities and policy makers It will also be of interest to all classroom science teachers who seek to keep abreast of the latest research and development and thinking in their area of professional concern **Science and Technical Education** United States.
