Making the Implicit Explicit Barbara E. Lovitts, 2023-07-03 Despite their and other stakeholders consistent demand for excellence doctoral programs have rarely if ever been assessed in terms of the quality of the dissertations departments produce Yet dissertations provide the most powerful objective measure of the success of a department's doctoral program Indeed assessment when done properly can help departments achieve excellence by providing insight into a program's strengths and weaknesses This book and the groundbreaking study on which it is based is about making explicit to doctoral students the tacit rules for the assessment of the final of all final educational products the dissertation The purpose of defining performance expectations is to make them more transparent to graduate students while they are in the researching and writing phases and thus to help them achieve to higher levels of accomplishment Lovitts proposes the use of rubrics to clarify performance expectations not to rate dissertations or individual components of dissertations to provide a summary score but to facilitate formative assessment to support not substitute for the advising process She provides the results of a study in which over 270 faculty from ten major disciplines spanning the sciences social sciences and humanities were asked to make explicit their implicit standards or criteria for evaluating dissertations The book concludes with a summary of the practical and research implications for different stakeholders faculty departments universities disciplinary associations accrediting organizations and doctoral students themselves The methods described can easily be adapted for the formative assessment of capstone courses senior and master's theses comprehensive exams papers and journal articles
