Buljevich,Yoon S. Park,2007-08-27 Since the 1970s the practice of financing major private and public sector capital intensive projects has shifted to an ever greater reliance on private funding sources as opposed to direct financing through the issuance of corporate or government bonds In the 1990s these financing practices have undergone further changes with the increasing globalization of capital markets the growth of derivative instruments and the rapid increase in information

technology that enhances cash management practices Today s project financing market is increasingly using sophisticated capital market bank and agency financing mechanisms as well as using derivative instruments for asset and liability management Thus financial market innovations are bringing the once separate fields of project financing and international finance more closely together This is the first book to treat both topics as an interrelated whole for contemporary project financing cannot be fully understood without a good working knowledge of the international financial markets that have developed the various financing techniques and funding sources being used The book provides an in depth description of cross border project financing as a technique for financing capital intensive projects as well as an overview of certain financing and derivative instruments currently available in the global financial markets The first part of the book provides an overview of certain funding and derivative instruments currently used in the international financial markets including a general overview of financial innovations that have occurred in recent decades Topics covered include an introduction to the syndicated Euro credit market an overview of various marketable debt securities actively used in the international financial markets an introduction to depositary receipt as an innovative way of raising cross border equity capital an elaboration of the derivative instruments most commonly used in the project financing arena including interest rate currency and commodity swaps and finally an overview of banks off balance sheet activities as a critical driving force for the participation of banks in the international financial and derivative markets The second part of the book provides an in depth analysis of project financing that concentrates on the financier s perspective Topics covered include a general overview of the project financing industry a step by step description of a typical cross border project finance transaction a description of the main characteristics and advantages of project financing as opposed to more traditional corporate lending practices an overview of appraisal techniques for assessing project financing a comprehensive analysis of the different risk management techniques used in project financing for reducing distributing and hedging risks and a brief overview of certain limited resource financing schemes The book includes a special focus on the various stages of the risk management process for project financing elaborating on the different stages of risk identification risk assessment risk reduction risk distribution and hedging and insurance The authors also provide a comprehensive glossary of terms relating to international finance and project financing This book will fulfill the need for an essential text on project financing as well as a professional reference guide

Project Finance in Developing Countries Priscilla Anita Ahmed, Xinghai Fang, 1999-01-01 This report explores the changing face of project finance in developing markets IFC and more recently other multilateral bilateral and export credit institutions have played a strong supportive role in bringing project finance to its current volumes This role was highlighted in 1998 when these institutions sustained flows of an estimated 25 billion at a time when there was an abrupt decline in some

types of private flows IFC in particular was a pioneer of project finance in developing countries and has a unique depth of experience in this field which spans more than 40 years in the practical implementation of some 2000 projects many of them on a limited recourse basis Particularly in today's marketplace IFC's ability to mobilize finance both loan and equity for its own account and syndicated loans under its B loan program the strength of its project appraisal capabilities and its experience in structuring complex transactions in difficult environments have been reassuring to other participants and important to the successful financing of many projects This report draws on IFC's experience in more than 230 greenfield projects costing upward of 30 billion that relied on project finance on a limited recourse basis see Appendix A It opens with a brief description of the major international trends in project finance over the past two decades and then turns to the essential ingredients of successful project financing Publisher abstract
