Existential Technics:

Existential Technics Don Ihde, 1983-06-30 With *Existential Technics* Don Ihde advances his reflections on the role technology plays in human life Heretofore primarily the province of Continental thinkers philosophy of technology is a growing preoccupation of North American philosophers This collection of essays is a philosophical reflection on and critique of human experience from a clearly American perspective guided by phenomenological analysis This book is divided into three parts The first technics deals with human interaction with technology and its existential effects The remaining sections on perception and interpretation examine the imaginative use of phenomenology in the visual and auditory realms of art music and intercultural perceptions and are followed by discussions of contemporary hermeneutics and deconstruction theory particularly in the thought of Heidegger and Derrida

Postphenomenology Evan Selinger, 2012-02-01 Postphenomenology is the first book devoted exclusively to the interpretation and advancement of prominent phenomenologist Don Ihde s landmark contributions to history philosophy sociology science sound studies and technology studies Ihde has made a direct and lasting impact on the study of technological experience across the disciplines and acquired an international following of diverse scholars along the way many of whom contribute to Postphenomenology including Albert Borgmann who characterizes Ihde as being among the most interesting and provocative contemporary American philosophers The contributors situate assess and apply Ihde s philosophy with respect to the primary themes that his oeuvre emphasizes They not only clarify Ihde s work but also make significant contributions to the philosophy of technology phenomenology hermeneutics and the philosophy of science A comprehensive response from Ihde concludes the volume

American Phenomenology E.F. Kaelin, Calvin O. Schrag, 2012-12-06 THEODORE KISIEL Date of birth October 30 1930 Place of birth Brackenridge Pennsylvania Date of institution of highest degree PhD Duquesne University 1962 Academic appointments University of Dayton Canisius College Northwestern University Duquesne University Northern Illinois University I first left the university to pursue a career in metallurgical research and nuclear technology But I soon found myself drawn back to the university to round out an overly specialized education It was along this path that I was waylaid into philosophy by teachers like H L Van Breda and Bernard Boelen The philosophy department at Duquesne University was then 1958 1962 a veritable little Louvain and the Belgian Dutch connection exposed me to among other visiting scholars Jean Ladriere and Joe Kockelmans who planted the seeds which eventually led me to the hybrid discipline of a hermeneutics of natural science and prompted me soon after graduation to make the first of numerous extended visits to Belgium and Germany The endeavor to learn French and German led me to the task of translating the phenomenological literature bearing especially on natural science and on Heidegger The talk in the sixties was of a continental divide in philosophy between Europe and the Anglo American world But in designing my courses in the philosophy of science I naturally gravitated to the works of Hanson Kuhn Polanyi and Toulmin without at first fully realizing why I felt such a strong

kinship with them beyond their common anti positivism *Thinking through Technology* Carl Mitcham,2024-05-31 What does it mean to think about technology philosophically Why try These are the issues that Carl Mitcham addresses in this work a comprehensive critical introduction to the philosophy of technology and a discussion of its sources and uses Tracing the changing meaning of technology from ancient times to our own Mitcham identifies the most important traditions of critical analysis of technology the engineering approach which assumes the centrality of technology in human life and the humanities approach which is concerned with its moral and cultural boundaries Mitcham bridges these two traditions through an analysis of discussions of engineering design of the distinction between tools and machines and of engineering science itself He looks at technology as it is experienced in everyday life as material objects from kitchenware to computers as knowledge including recipes rules theories and intuitive know how as activity design construction and use and as volition knowing how to use technology and understanding its consequences By elucidating these multiple aspects Mitcham establishes criteria for a more comprehensive analysis of ethical issues in applications of science and technology This book will guide anyone wanting to reflect on technology and its moral implications

Hermeneutics and Deconstruction Hugh J. Silverman,Don Ihde,1985-09-30 Hermeneutics and Deconstruction provides an assessment of two dominant modes of thinking and writing in continental philosophy today It addresses central issues in the theory of interpretation and in the strategies of textual reading Placed in the context of contemporary philosophical practice this volume raises the question of the end of philosophy and offers different ways of understanding how the question of closure in philosophy can itself open up a whole range of philosophical activities Special attention is given to the practice of interpretation in the areas of science perception and literature and to the dimensions of hermeneutic understanding with respect to being life and the world An investigation of how history is interpreted and read as a text provides access to one of the significant differences between hermeneutic understanding and deconstructionist practice A section is devoted to the controversy concerning the value and the achievement of deconstruction The writings of Heidegger and Derrida are juxtaposed and examined And the volume concludes with several indications of new directions in continental philosophy and various versions of what a post Derridean reading might entail
