Evolutionary Journey:

When We Became Humans Michael Bright, 2019 What makes us human and where did we come from How did a clever ape climb down from the trees and change the world like no other animal has done before This large format highly illustrated book guides readers through the key aspects of the human story from the anatomical changes that allowed us to walk upright and increased brain size in our ancestors to the social cultural and economic developments of our more recent cousins and our own species Along the way focus spreads take a closer look at some of the key species in our history from the ancient Australopithecus Afarensis Lucy to our recent cousins the Neanderthals and ourselves Homo sapiens Looking beyond the anatomical evolution of humans this book explores how our culture and way of living has evolved from how trails of cowry shells reveal early trade between tribes to how and why humans first domesticated dogs horses and farm animals and began settling in permanent villages and cities Through digestible information and absorbing illustration young readers will be given an insight into their own origins and what it really means to be a human *Guided Evolution of Society* Bela H. Banathy, 2013-03-09 Based on a comprehensive review of human and societal evolution the book develops an approach to conscious self guided evolution In the course of the evolutionary journey of our species there have been three seminal events The first happened some seven million years ago when our humanoid ancestors entered on the evolutionary scene Their journey toward the second crucial event lasted over six million years when as the greatest event of our evolutionary history homo sapiens sapiens started the revolutionary process of cultural evolution Today we have arrived at the threshold of the third major event the revolution of conscious evolution when it becomes our responsibility to enter into the evolutionary design space and guide the evolutionary journey of our species The book tells the story of the first six million years of the journey in just enough detail to understand how evolution had worked in times when it was primarily biological driven by natural selection With the human revolution some fifty thousand years ago with the emergence of self reflective consciousness the evolutionary process transformed from biological into cultural From this point on the book follows the journey with detailed attention in order to learn how cultural evolution works The book is organized in three parts Part One commences with an exposition of a brief history of the evolutionary idea through time with a focus on a review of the science of general evolution and specifically social and societal evolution Next the book unfolds the evolutionary story of our species from the time when the first humanoids entered the evolutionary scene to our current era Part Two develops a systems view of evolution explores the ways and means of how evolution works characterizes evolutionary consciousness and develops the idea of conscious evolution Part Three builds upon the knowledge developed in the first two parts and sets forth the key conditions of conscious self guided evolution elaborating the core condition which is the acquisition of evolutionary competence through evolutionary learning The focus of this part is on an approach to the design of evolutionary guidance systems that our families neighborhoods communities organizations social and societal systems can use to design the future

they aspire to attain The work is set aside from other statements in three important ways It provides 1 a comprehensive review of how evolution has worked with a focus on socio cultural evolution 2 an explanation of evolutionary consciousness and the conditions of engaging in conscious evolution and 3 most significantly it develops a detailed approach and a methodology to the design of evolutionary guidance systems **The Evolutionary Journey** Barbara Marx Hubbard,1982

Dialogue as a Collective Means of Design Conversation Patrick M. Jenlink,Bela H. Banathy,2007-11-24 Dialogue as a Collective Means of Design Conversation is the second volume edited by Patrick M Jenlink and Bela H Banathy to offer a cross disciplinary approach to examining dialogue as a communicative medium In this Compendium the contributing authors set forth their ideas experiences and perspectives as the path of a learning journey a journey of new meaning of new understanding and of becoming self aware of design conversation as future creating and consciousness evolving In particular this volume comes at a time when we as a global society are faced with the question of how we shape our actions and in turn shape our future through conversation that is focused on resolving global conflict and fostering world peace The volume evokes in the reader a realization that our greatest potential rests in no small measure with our collective capacity for cultural creativity and in our capacity to achieve new levels of consciousness through dialogue and design conversation

A Remarkable Journey R. Paul Thompson,2015 Charles Darwin published On the Origin of Species a little over one hundred and fifty years ago and it changed everything But many don t realize that it took Darwin over twenty years to develop his theory that others had been advocating a similar theory before him and many others have been developing it since In A Remarkable Journey R Paul Thompson tells the story of evolutionary theory of the empirical and theoretical discoveries and the endless heated debates that have led to our understanding of it today As Thompson shows the tortuous path from Darwin s brilliant formulation to today s robust and vibrant model is filled with intrigue Evolutionary theory has become in many respects the center of biological science and its maturation is an indication of a larger and more sophisticated scientific understanding more generally But this development was not easily won a point Thompson makes clear as he takes readers from one stage of the theory s maturation to the next detailing all that went into the development of what most of us now take for granted as a basic and beautiful principle of life Spiritual Evolution Benjamin F.
