Everything You Already Know:

Rewriting Eve Ronna J. Detrick, 2023-10-03 We wouldn't consider letting Isis Medusa Pandora or Persephone slip from our lexicon To somehow forget the legend of Harriet Tubman Anne Frank or Mother Teresa would never cross our minds And yet when it comes to the stories of Eve and other biblical characters they are rarely known barely appreciated and ostensibly lost by most of us not deeply entwined within organized religion Trapped in patriarchy and theological argument dismissed as irrelevant or viewed as unchangeable even as times change these women's voices desires and hearts have too often been silenced through misunderstanding and neglect As result we are as well But when they are reimagined deconstructed disentangled from doctrine and dogma and heard on their own terms these stories become powerful inspiration and a source of discernment that reconnects us to a feminine lineage and a sovereign sense of self we've never known to call on or trust In *Rewriting Eve Rescuing Women's Stories from the Bible and Reclaiming Them As Our Own* Ronna Detrick invites us into the presence and power of ten sacred women revealing the endlessly relevant ways in which they speak today and showing how they can heal embolden and transform our stories

Innovating Luis Perez-Breva, 2018-08-28 Discover the MIT developed doer's approach to innovation with this guide that reveals you don't need an earth shattering idea to create a standout product service or business just a hunch that you can scale up to impact Innovation is the subject of countless books and courses but there's very little out there about how you actually innovate Innovation and entrepreneurship are not one and the same although aspiring innovators often think of them that way They are told to get an idea and a team and to build a show and tell for potential investors In *Innovating* Luis Perez Breva describes another approach a doer's approach developed over a decade at MIT and internationally in workshops classes and companies He shows that innovating doesn't require an earth shattering idea all it takes is a hunch Anyone can do it By prototyping a problem and learning by being wrong innovating can be scaled up to make an impact As Perez Breva demonstrates nothing is new at the outset of what we only later celebrate as innovation In *Innovating* the process illustrated by unique and dynamic artwork is shown to be empirical experimental nonlinear and incremental You give your hunch the structure of a problem Anything can be a part Your innovating accrues other people's knowledge and skills Perez Breva describes how to create a kit for innovating and outlines questions that will help you think in new ways Finally he shows how to systematize what you've learned to advocate communicate scale up manage innovating continuously and document you need a notebook to converse with yourself he advises Everyone interested in innovating also needs to read this book
