

# Handwriting and Personality

Handwriting is a technique of drawing strokes to form letters or words of a particular script with a writing tool on a writable surface. Handwriting is a skill taught to an individual during the very initial phases of life since it is one of the easiest and most common methods of communication.

Every person is unique in showing a set of personality traits. These traits can be found in various combinations among individuals. With the help of graphology, which is the study of handwriting to analyse an individual's personality, the writer's personality can be identified by analysing the strokes applied while writing.
