## **Falling Man:**

*Hospitality in a Time of Terror* Lindsay Anne Balfour, 2017-11-02 *Hospitality in a Time of Terror* Strangers at the Gate offers a reading of hospitality that suggests the encounter with strangers is at the core of cultural production and culture itself in the aftermath of the terrorist attacks of September 11 2001 It documents the significance of hospitality after the terrorist attacks particularly as such an ethics is so provocatively raised or disavowed by a predominantly visual and cultural archive that has been and continues to be consumed by millions of people around the world This book utilizes works of cultural memory film art and literature that show the breadth of hospitality's influence but that offer a depth of insight historical specificity and theoretical intensity that only a product created in the aftermath of 9 11 allows The September 11 Memorial and Museum in New York City for example is best understood as an institution defined by the question of hospitality particularly as hospitality is engaged or disavowed through an experience with loss This book also considers how hospitality might function in consideration of the violence perpetuated against bodies marked by discourses of race gender and sexuality as is the case in the 2011 film *Zero Dark Thirty* and separately explores how alternative modes of hospitality are enabled by the fluid and dynamic space of the street and the urban art found there The final chapter examines Don DeLillo's 2007 novel *Falling Man* and argues that the novel demonstrates a sustained engagement with hospitality through the figure of organic shrapnel a metaphor that suggests the possibility of being literally and figuratively embedded by another The purpose of this book is to point out the diverse and even devastating ways that hospitality appears in ways that remind us that if hospitality as we understand it is failing it matters more than ever how we deploy it

*The War on Terror and American Popular Culture* Andrew Schopp, Matthew B. Hill, 2009 *The War on Terror and American Popular Culture* is a collection of original essays by academics and researchers from around the world that examines the complex interrelation between the Bush administration's War on Terror and American popular culture Written by experts in the fields of literature film and cultural studies this book examines in detail how popular culture reflects concerns and anxieties about the September 11 attacks and the war those attacks generated how it interrogates the individual and collective impacts that war has wrought how it might challenge or critique current policy and how it might reinforce or endorse the war and its sociopolitical paradigms

**Learning How to Fall** T Nikki Cesare Schotzko, 2014-12-17 Beginning with Richard Drew's controversial photograph of a man falling from the North Tower of the World Trade Center on September 11 *Learning How to Fall* investigates the changing relationship between world events and their subsequent documentation asking Does the mediatization of the event overwhelm the fact of the event itself How does the mode by which information is disseminated alter the way in which we perceive such information How does this impact upon our memory of an event T Nikki Cesare Schotzko posits contemporary art and performance as not only a stylized re-envisioning of daily life but inversely as a viable means by which one might experience and process real world political and social events This approach combines two

concurrent and contradictory trends in aesthetics narrative and dramaturgy the dramatization of real world events so as to broaden the commercial appeal of those events in both mainstream and alternative media and the establishment of a more holistic relationship between politically and aesthetically motivated modes of disseminating and processing information By presenting engaging and diverse case studies from both the art world and popular culture including Aliza Shvarts's censored senior thesis at Yale University Kerry Skarbakka's provocative photographs of falling Didier Morelli's crawl through Toronto and Aaron Sorkin's *The Newsroom* Learning How to Fall creates a new understanding of the relationship between the event and its documentation where even the truth of an event might be called into question

*Gamer Nation* John Wills, 2019-05-21 Explores how games actively influence the ways people interpret and relate to American life In 1975 design engineer Dave Nutting completed work on a new arcade machine A version of Taito's *Western Gun* a recent Japanese arcade machine Nutting's *Gun Fight* depicted a classic showdown between gunfighters Rich in Western folklore the game seemed perfect for the American market players easily adapted to the new technology becoming pistol wielding pixel cowboys One of the first successful early arcade titles *Gun Fight* helped introduce an entire nation to video gaming and sold more than 8 000 units In *Gamer Nation* John Wills examines how video games co-opt national landscapes livelihoods and legends Arguing that video games toy with Americans mass cultural and historical understanding Wills show how games reprogram the American experience as a simulated reality Blockbuster games such as *Civilization* *Call of Duty* and *Red Dead Redemption* repackage the past refashioning history into novel and immersive digital states of America Controversial titles such as *Custer's Revenge* and *0846* recode past tragedies Meanwhile online worlds such as *Second Life* cater to a desire to inhabit alternate versions of America while *Paperboy* and *The Sims* transform the mundane tasks of everyday suburbia into fun and addictive challenges Working with a range of popular and influential games from *Pong* *Civilization* and *The Oregon Trail* to *Grand Theft Auto* *Silent Hill* and *Fortnite* Wills critically explores these gamic depictions of America Touching on organized crime nuclear fallout environmental degradation and the War on Terror Wills uncovers a world where players casually massacre Native Americans and Cold War soldiers alike a world where neo colonialism naive patriotism disassociated violence and racial conflict abound and a world where the boundaries of fantasy and reality are increasingly blurred Ultimately *Gamer Nation* reveals not only how video games are a key aspect of contemporary American culture but also how games affect how people relate to America itself

9/11 Fiction, Empathy, and Otherness Tim Gauthier, 2015-04-02 9/11 Fiction Empathy and Otherness analyzes recent works of fiction whose principal subject is the attacks of September 11 2001 The readings of the novels question and assess the validity and potential effectiveness of both the subsequent calls for a cosmopolitan outlook and the related but no less significant emphasis placed on empathy and exhibited in such recent studies as Jeremy Rifkin's *The Empathic Civilization* Karsten Stueber's *Rediscovering Empathy* and Julinna Oxley's *The Moral Dimensions of Empathy* As such this study examines the extent to which us and them narratives proliferated after 9/11 and the degree to which calls

for greater empathy and a renewed emphasis on cosmopolitan values served to counterbalance an apparent movement towards increased polarization encapsulated in the oft mentioned clash of civilizations A principal objective of the book is thus to examine the ethical and political implications revealed in the exercising or withholding of empathy For though empathy in and of itself may not be sufficient it is nevertheless a vital component in the generation of actions one might identify as cosmopolitan In other words this book examines the responses to 9 11 in both Western and non Western novels in order to uncover what their dramatic renderings might tell us about the possibility of a truly globalized community The attainability of any cosmopolitan engagement is contingent upon our abilities to understand the other knowing always that otherness eludes our grasp and the best we can do is imagine some version of it It is primarily in this capacity that the novel has a role to play Whether it is the challenge of connecting with the survivors of trauma and the inhabitants of a traumatized city or with a hyperpower that has experienced its own vulnerability for the first time or even with the terrorist who seeks to commit violent acts these novels afford us the means of examining the complex dynamics involved in any exhibition of fellow feeling for the other and the ever present potential failure of that engagement

The Prestige of Violence Sally Bachner,2011 In The Prestige of Violence Sally Bachner argues that starting in the 1960s American fiction laid claim to the status of serious literature by placing violence at the heart of its mission and then insisting that this violence could not be represented Bachner demonstrates how many of the most influential novels of this period are united by the dramatic opposition they draw between a debased and untrustworthy conventional language on the one hand and a violence that appears to be prelinguistic and unquestionable on the other Genocide terrorism war torture slavery rape and murder are major themes yet the writers insist that such events are unspeakable Bachner takes issue with the claim made within trauma studies that history is the site of violent trauma inaccessible to ordinary representation Instead she argues both trauma studies and the fiction to which it responds institutionalize an inability to address violence Examining such works as Vladimir Nabokov s Pale Fire Thomas Pynchon s The Crying of Lot 49 Norman Mailer s Armies of the Night Margaret Atwood s Surfacing and Philip Roth s The Plot Against America Bachner locates the postwar prestige of violence in the disjunction between the privileged security of wealthier Americans and the violence perpetrated by the United States abroad The literary investment in unspeakable and often immaterial violence emerges in Bachner s readings as a complex and ideologically varied literary solution to the political geography of violence in our time
