An Introduction to Global Studies Tuo Cai,Zhenye Liu,2022-07-30

Since the 1950s globalization has been an increasingly irresistible trend and one that has exerted a tremendous impact on the political economic military environmental and social fortunes of mankind and yet existing theories in humanities and social sciences have been fundamentally built upon the traditional nation state model These two volumes a pioneering work on global studies to be published out of China aims at creating a new theoretical framework against the backdrop of globalization Volume 1 introduces the core concepts and discusses the critical issues of globalization while the editors redefine notions of politics economics law and globality while deploying globalization as a

theoretical framework Volume 2 examines the multi level and multi dimensional nature of globalization analysing processes and systems of global society in the light of globalization and exploring the construction of a stable and rational global order These two volumes of global studies are an essential reference for scholars and students in politics economics international relations and law *Decentring Global Challenges in International Relations* Debora Valentina Malito, Evangelos Fanoulis, 2025-08-21 This book examines contemporary global challenges from a decentring perspective advancing an interdisciplinary conversation International studies scholarship has become increasingly more interdisciplinary and multifocal especially as the escalation of systemic ecological and economic crises as well as social and political challenges in the 21st century have required comprehensive ways of thinking and taking stock of existing ontological and epistemic limitations A decentring approach is crucial to account for how interdependent relations across states and societies regions and the globe shape modernity and its global manifestations are in an era of growing and persistent crises The book explains why traditional hegemonic approaches to global challenges are problematic and conceptualises what a decentring approach to global challenges entails a deconstruction of traditional and sedimented epistemic underpinnings implying a rethinking of agency time geographies norms topics and loci of public attention but also an appreciation of the mutually constructed nature of the international This book will appeal to students and scholars of international relations IR and international studies who are interested in decentring as well as those working for civil society organisations CSOs NGOs and think tanks

Jackson, 1998 *'Discerning the Obedience of Faith'* David Parker, 2018-05-10 The Theological Commission of the World Evangelical Alliance formerly World Evangelical Fellowship was established in 1974 but its origins go back to 1968 when the inspiration of Scripture was under intense discussion in a meeting of the WEF in Lausanne Switzerland This book tells the story of how at that meeting New Zealand missionary theologian Bruce J Nicholls then working in India gave a stimulating paper on theological issues involved in the growth of Christian witness in Asia which resulted in the recognition of a need for organised efforts to promote theological reflection After a pilot program the TC was formed and went on to harness the best evangelical theological life around the world to develop higher standards of theological education provide direction on key issues through many conferences books and journals and to help the WEA present the evangelical voice on important platforms This volume marks forty years of activity and shows how the Theological Commission under its vision of discerning the obedience of faith makes a unique contribution to evangelical life and witness around the world *The State of Canada's Forests* Canadian Forest Service, Climate Change Policy after Kyoto Warwick J. McKibbin, Peter J. Wilcoxon, 2002-12-16 The Kyoto Protocol represents nearly a decade of international effort to reduce carbon emissions While the treaty is the product

of enormous international political effort it has not been ratified by any major greenhouse emitter and it has been rejected by the United States In this controversial new book Warwick J McKibbin and Peter Wilcoxon argue that the current approach of international negotiations on the Kyoto Protocol is going completely in the wrong direction In Climate Change Policy after Kyoto they attempt to steer the policy debate toward a realistic blueprint for effective policy The authors believe that managing uncertainty particularly the future costs of any plan is key to realistic climate policy They maintain that sustainable policy should meet four basic criteria it should slow down carbon dioxide emissions where it is cost effective to do so compensate those who are hurt economically require a high degree of consensus both domestically and internationally and allow countries to enter the program easily and continue to participate even if they drop out of the agreement at certain times The book summarizes the current state of knowledge about climate change and discusses the history of negotiations since 1992 in the process identifying the Kyoto Protocol as the wrong approach to the problem It outlines important insights that economic theory offers for the design of climate policy and uses those insights to develop a simple framework that will reduce greenhouse gas emissions while guaranteeing that short run costs of compliance will not be excessive The authors conclude by outlining a process by which international negotiations on climate control can proceed to an agreement that is both durable and feasible for all nations
