characteristics of globalization might occur Berlin Brussels Hanoi Ho Chi Minh City Hong Kong Jerusalem Johannesburg Moscow St Petersburg Sarajevo and Vienna Using these important cities the special relationship between global and local regional forces is analyzed The case studies were selected based on their political and cultural context and the fact that their social and political fabric was subject to major changes in the recent past How global processes manifest themselves locally depends to a great extent on how development processes and endogenic potentials are initiated locally in order to cope with the new global economic and societal conditions

are ever more rigid and controlling

**Globalization and Families** Bahira Trask, 2009-12-01

As our world becomes increasingly interconnected through economic integration technology communication and political transformation the sphere of the family is a fundamental arena where globalizing processes become realized For most individuals family in whatever configuration still remains the primary arrangement that meets certain social emotional and economic needs It is within families that decisions about work care movement and identity are negotiated contested and resolved Globalization has profound implications for how families assess the choices and challenges that accompany this process Families are integrated into the global economy through formal and informal work through production and consumption and through their relationship with nation states Moreover ever growing communication and information technologies allow families and individuals to have access to others in an unprecedented manner These relationships are accompanied by new conceptualizations of appropriate lifestyles identities and ideologies even among those who may never be able to access them Despite a general acknowledgement of the complexities and social significance inherent in globalization most analyses remain top down focused on the global economy corporate strategies and political streams This limited perspective on globalization has had profound implications for understanding social life The impact of globalization on gender ideologies work family relationships conceptualizations of children youth and the elderly have been virtually absent in mainstream approaches creating false impressions that dichotomize globalization as a separate process from the social order Moreover most approaches to globalization and social phenomena emphasize the Western experience These inaccurate assumptions have profound implications for families and for the globalization process itself In order to create and implement programs and policies that can harness globalization for the good of mankind and that could reverse some of the deleterious effects that have affected the world's most vulnerable populations we need to make the interplay between globalization and families a primary focus
