

The background of the cover is a lush, futuristic landscape. In the foreground, a character with a red helmet and a backpack stands in a field of tall grass, looking towards a body of water. In the middle ground, there are several large, dome-shaped structures and a long, low building. In the background, there are jagged, mountain-like peaks under a hazy, orange-tinted sky. Two small, flying vehicles are visible in the upper part of the sky.

Futures Past:

Futures Past Reinhart Koselleck, 2004-06-16 Modernity in the late eighteenth century transformed all domains of European life intellectual industrial and social Not least affected was the experience of time itself ever accelerating change left people with briefer intervals of time in which to gather new experiences and adapt In this provocative and erudite book Reinhart Koselleck a distinguished philosopher of history explores the concept of historical time by posing the question what kind of experience is opened up by the emergence of modernity Relying on an extraordinary array of witnesses and texts from politicians philosophers theologians and poets to Renaissance paintings and the dreams of German citizens during the Third Reich Koselleck shows that with the advent of modernity the past and the future became relocated in relation to each other The promises of modernity freedom progress infinite human improvement produced a world accelerating toward an unknown and unknowable future within which awaited the possibility of achieving utopian fulfillment History Koselleck asserts emerged in this crucial moment as a new temporality providing distinctly new ways of assimilating experience In the present context of globalization and its resulting crises the modern world once again faces a crisis in aligning the experience of past and present To realize that each present was once an imagined future may help us once again place ourselves within a temporality organized by human thought and humane ends as much as by the contingencies of uncontrolled events

Time Joel Burges, Amy Elias, 2016-08-02 The critical condition and historical motivation behind Time Studies The concept of time in the post millennial age is undergoing a radical rethinking within the humanities Time A Vocabulary of the Present newly theorizes our experiences of time in relation to developments in post 1945 cultural theory and arts practices Wide ranging and theoretically provocative the volume introduces readers to cutting edge temporal conceptualizations and investigates what exactly constitutes the scope of time studies Featuring twenty essays that reveal what we talk about when we talk about time today especially in the areas of history measurement and culture each essay pairs two keywords to explore the tension and nuances between them from past future and anticipation unexpected to extinction adaptation and serial simultaneous Moving beyond the truisms of postmodernism the collection newly theorizes the meanings of temporality in relationship to aesthetic cultural technological and economic developments in the postwar period This book thus assumes that time not space as the postmoderns had it is central to the contemporary period and that through it we can come to terms with what contemporaneity can be for human beings caught up in the historical present In the end Time reveals that the present is a cultural matrix in which overlapping temporalities condition and compete for our attention Thus each pair of terms presents two temporalities yielding a generative account of the time or times in which we live Tense Future Paul K. Saint-Amour, 2015 *Tense Future* falls into two parts The first develops a critical account of total war discourse and addresses the resistant potential of acts including acts of writing before a future that looks barred or predetermined by war Part two shifts the focus to long interwar narratives that pit both their scale and their formal turbulence against total war's portrait of

the social totality producing both ripostes and alternatives to that portrait in the practice of literary encyclopedism The book's introduction grounds both parts in the claim that industrialized warfare particularly the aerial bombing of cities intensifies an under examined form of collective traumatization a pretraumatic syndrome in which the anticipation of future conditional violence induces psychic wounds Situating this claim in relation to other scholarship on critical futurities Saint Amour discusses its ramifications for trauma studies historical narratives generally and the historiography of the interwar period in particular The introduction ends with an account of the weak theory of modernism now structuring the field of modernist studies and of weak theory's special suitability for opposing total war that strongest of strong theories

Knowing Future Time In and Through Greek Historiography Alexandra Lianeri, 2016-03-07 From the early modern period Greek historiography has been studied in the context of Cicero's notion *historia magistra vitae* and considered to exclude conceptions of the future as different from the present and past Comparisons with the Roman Judeo Christian and modern historiography have sought to justify this perspective by drawing on a category of the future as a temporal mode that breaks with the present In this volume distinguished classicists and historians challenge this contention by raising the question of what the future was and meant in antiquity by offering fresh considerations of prognostic and anticipatory voices in Greek historiography from Herodotus to Appian and by tracing the roots of established views on historical time in the opposition between antiquity and modernity They look both at contemporary scholarly argument and the writings of Greek historians in order to explore the relation of time especially the future to an idea of the historical that is formulated in the plural and is always in motion By reflecting on the prognostic of historical time the volume will be of interest not only to classical scholars but to all who are interested in the history and theory of historical time

Diverging Time David Carvounas, 2002-01-01 Temporal divergence creates a need for new narratives and paradigms In *Diverging Time* David Carvounas supports this assertion through detailed expository and diagnostic readings of Kant Hegel and Marx He focuses on their contribution to our understanding of modernity as an epochal shift in the relationship between past and future recasting the significance of the past and future of the modern present Despite their different solutions to the problem of temporal coordination they urged the modern world to look not to the past but to the newly opened future for continuity meaning and purpose This book not only offers a fresh look at a defining characteristic of modernity but also makes a compelling case that a coherent modern temporal structure requires a sustainable orientation toward the future an orientation that Kant Hegel and Marx delineate in distinctive and powerful ways

Contemporary Art in the Post-Yugoslav Space Jonathan Blackwood, Jasmina Tumbas, 2025-10-20 This edited volume is centered on the production discussion and consumption of contemporary art in the post Yugoslav space now Authors in this volume demonstrate how and why contemporary art discourses have continued to overcome chronic difficulties in local cultural economies since the dissolution of the common federal space of socialist Yugoslavia This book focuses on socialist Yugoslavia's prevailing cultural legacies of anti fascism non alignment queer and

feminist movements and socially engaged art which inform and shape contemporary critiques of neoliberal capitalist conditions in the arts Chapters are rooted in ongoing global challenges in contemporary art a universal exhaustion through over work on the part of the artist art worker and over stimulation the audience the structural weakness of contemporary art as a set of institutional activities and the instrumentalization of art The book will be of interest to scholars working in art history contemporary art gender studies Slavic studies politics and post conflict studies Chapters 1 10 and 17 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license *Futures Unlimited* Robert M.
