Leondes, 2001-09-26 This six volume set presents cutting edge advances and applications of expert systems Because expert systems combine the expertise of engineers computer scientists and computer programmers each group will benefit from buying this important reference work An expert system is a knowledge based computer system that emulates the decision making ability of a human expert The primary role of the expert system is to perform appropriate functions under the close supervision of the human whose work is supported by that expert system In the reverse this same expert system can monitor and double check the human in the performance of a task Human computer interaction in our highly complex world requires the development of a wide array of expert systems Expert systems techniques and applications are presented for a diverse array of topics including Experimental design and decision support The integration of machine learning with knowledge acquisition for the design of expert systems Process planning in design and manufacturing systems and process control applications Knowledge discovery in large scale knowledge bases Robotic systems Geographical information systems Image analysis recognition and interpretation Cellular automata methods for pattern recognition Real time fault tolerant control systems CAD based vision systems in pattern matching processes Financial systems Agricultural applications Medical diagnosis **Applied Fuzzy Systems** Toshiro Terano, Kiyoji Asai, Michio Sugeno, 2014-05-10 *Applied Fuzzy Systems* provides information pertinent to the fundamental aspects of fuzzy systems theory and its application This book discusses the development of high level artificial intelligence and information processing systems as well as the realization of fuzzy computers Organized into six chapters this book begins with an overview of the fundamental problems addressed by fuzzy systems This text then reviews standard computer logic or two valued Boolean algebra Other chapters consider bus scheduling evaluation of structural reliability applications of schema systems for decision making and processing of natural

language information and systems for medical diagnosis as examples of fuzzy expert systems This book discusses as well a practical fuzzy expert system for durability evaluations of reinforced concrete slabs for bridges along with an example of application The final chapter deals with the important parts of the construction of fuzzy computers their architecture and the outlook for the future This book is a valuable resource for engineers mathematicians technicians and research workers

Fuzzy Expert System Tools Moti Schneider, 1996-08-06 Fuzzy set theory is a mathematical structure for representing uncertainty Modern intelligent systems must combine knowledge based on techniques for gathering and processing information with methods of approximate reasoning This enables an intelligent system to better emulate human decision making in uncertain environments Complimentary to the text is a software package containing executable FEST code The text contains a detailed description of FEST and its coherent and systematic exploitation

Granular Computing and Decision-Making Witold Pedrycz, Shyi-Ming Chen, 2015-04-21 This volume is devoted to interactive and iterative processes of decision making I2 Fuzzy Decision Making in brief Decision making is inherently interactive Fuzzy sets help realize human machine communication in an efficient way by facilitating a two way interaction in a friendly and transparent manner Human centric interaction is of paramount relevance as a leading guiding design principle of decision support systems The volume provides the reader with an updated and in depth material on the conceptually appealing and practically sound methodology and practice of I2 Fuzzy Decision Making The book engages a wealth of methods of fuzzy sets and Granular Computing brings new concepts architectures and practice of fuzzy decision making providing the reader with various application studies The book is aimed at a broad audience of researchers and practitioners in numerous disciplines in which decision making processes play a pivotal role and serve as a vehicle to produce solutions to existing problems Those involved in operations research management various branches of engineering social sciences logistics and economics will benefit from the exposure to the subject matter The book may serve as a useful and timely reference material for graduate students and senior undergraduate students in courses on decision making Computational Intelligence operations research pattern recognition risk management and knowledge based systems

Interval Neutrosophic Sets and Their Application in Multicriteria Decision Making Problems Hong-yu Zhang, Jian-qiang Wang, Xiao-hong Chen, As a generalization of fuzzy sets and intuitionistic fuzzy sets neutrosophic sets have been developed to represent uncertain imprecise incomplete and inconsistent information existing in the real world And interval neutrosophic sets INSs have been proposed exactly to address issues with a set of numbers in the real unit interval not just a specific number However there are fewer reliable operations for INSs as well as the INS aggregation operators and decisionmakingmethod For this purpose the operations for INSs are defined and a comparison approach is put forward based on the related research of interval valued intuitionistic fuzzy sets IVIFSs in this paper On the basis of the operations and comparison approach two interval neutrosophic number aggregation operators are developed Then a method formulticriteria decisionmaking problems is explored applying the aggregation

operators In addition an example is provided to illustrate the application of the proposed method **Management Decision Support Systems Using Fuzzy Sets and Possibility Theory** Janusz Kacprzyk, Ronald R. Yager, 1985

Evaluation of the Economic Relationships on the Basis of Statistical Decision-Making in Complex Neutrosophic Environment Abdul Nasir, Naeem Jan, Abdu Gumaei, Sami Ullah Khan, Mabrook Al-Rakhami, Fuzzy sets and fuzzy logics are used to model events with imprecise incomplete and uncertain information Researchers have developed numerous methods and techniques to cope with fuzziness or uncertainty This research intends to introduce the novel concepts of complex neutrosophic relations CNRs and its types based on the idea of complex neutrosophic sets CNSs

Expert Systems in Structural Safety Assessment Aleksandar S. Jovanovic, Karl F. Kussmaul, Alfredo C. Lucia, Piero P. Bonissone, 1989 Structural safety of industrial systems and components raises a steadily growing public scientific and engineering interest and causes permanent development of methods and techniques used for its assessment In addition to the well established engineering methods applied in the field several new methods and tools have emerged recently Among them the most novel ones are probably those related to expert system applications appearing as an important possible improvement of the current engineering practice The issue has been addressed by the international course EXPERT SYSTEMS IN STRUCTURAL SAFETY ASSESSMENT organized by MPA Stuttgart and JRC Ispra Stuttgart October 2 4 1989 and the proceedings of the course are contained in this volume of the Lecture Notes in Engineering The contributions invited lectures tackle the issues usually confronting developers and users of expert systems applied in structural engineering i e in structural safety and integrity assessment Both the book and the course are a combination of a tutorial and of presentation of the current achievements in the field Starting from the basic elements of expert systems knowledge based systems the book should guide the reader up to the applications in various particular sub domains **Simplified neutrosophic sets and their applications in multi-criteria group decision-making problems** Juan-juan Peng, Jian-qiang Wang, Jing Wang, Hong-yu Zhang, Xiao-hong Chen, As a variation of fuzzy sets and intuitionistic fuzzy sets neutrosophic sets have been developed to represent uncertain imprecise incomplete and inconsistent information that exists in the real world Simplified neutrosophic sets SNSs have been proposed for the main purpose of addressing issues with a set of specific numbers However there are certain problems regarding the existing operations of SNSs as well as their aggregation operators and the comparison methods Therefore this paper defines the novel operations of simplified neutrosophic numbers SNNs and develops a comparison method based on the related research of intuitionistic fuzzy numbers On the basis of these operations and the comparison method some SNN aggregation operators are proposed Additionally an approach for multi criteria group decision making MCGDM problems is explored by applying these aggregation operators Finally an example to illustrate the applicability of the proposed method is provided and a comparison with some other methods is made **Expert Fuzzy Information Processing** Olga Poleshchuk, Evgeniy Komarov, 2011-04-15 This book deals with expert evaluation models in

the form of semantic spaces with completeness and orthogonality properties complete orthogonal semantic spaces Theoretical and practical studies of some researchers have shown that these spaces describe expert evaluations most adequately and as a result they were often included in more sophisticated models of intellectual systems for decision making and data analysis Methods for constructing expert evaluation models of characteristics comparative analysis of these models studies of structural composition of their sets and constructing of generalized models are described Models to obtain rating points for objects and groups of objects with qualitative and quantitative characteristics are presented A number of regression models combining elements of classical and fuzzy regressions are presented All methods and models developed by the authors and described in the book are illustrated with examples from various fields of human activities This book meant for scientists in the field of computer science expert systems artificial intelligence and decision making and also for engineers post graduate students and students who study the fuzzy set theory and its applications

Fuzzy Set Theory and Its Applications H. J. Zimmerman, 1996

The complex neutrosophic soft expert set and its application in decision making Ashraf Al-Quran, Nasruddin Hassan, This paper presents a novel complex neutrosophic soft expert set CNSSES concept The range of values of CNSSES is extended to the unit circle in the complex plane by adding an additional term called the phase term which describes CNSSES s elements in terms of the time aspect

Readings in Fuzzy Sets for Intelligent Systems Didier J. Dubois, Henri Prade, Ronald R. Yager, 2014-05-12
